Submission: Hi I believe that ESC's rate rise should be approved as I understand and believe the case that has been put forward. The information I have received indicates a shortfall in funding assets that will only increase if not addressed immediately. There is also a number of some new projects that I am keen to see constructed. If we do nothing then the cost will eventually be passed on to our children and this is not the action of a mature community. I ask that you please support the application as I am concerned that if nothing is done, then the entire community will suffer the degrading of services.
