

An aerial photograph of a coastal walkway built on a rocky cliffside. The walkway is a long, narrow path with a metal railing, extending from a sandy beach area on the left up the cliff towards the ocean on the right. The ocean is a deep blue-green color, with some rocky outcrops and waves visible. The cliffside is covered in brown and tan rocks, with some sparse green vegetation. The sky is not visible, as the image is focused on the coastline.

We are a Big Region

The Central Coast is situated on the coastline of New South Wales, strategically located within 90 minutes of both Sydney and Newcastle and linked by the M1 motorway and most recently Northconnex connection, enabling greater access from Western Sydney. The region is vast being 1,680 km², stretching along 80km of coastline and encasing large lakes and waterways. It is an area of outstanding natural beauty ranging from beaches to valley ridgetops and from wetlands to bushland. This provides a scenic backdrop to urban development and the clusters of distinctive villages and town centres.

The population of the Central Coast is around 343,968, with projections for 415,000 people by 2036. The median age is 42 years old and the area's popularity for families continues to grow, making up 41% of the demographics. The region's dwellings include detached houses, medium density housing, some high-rise apartments, rural and semi-rural acreage and large farmlands. The region is serviced by the Newcastle train line and has an airport currently servicing recreational activities and transitioning to a precinct for general aviation.

The local economy is serviced by 24,188 registered local businesses, providing 121,245 local jobs and the gross regional product is valued at \$14.33 billion. The Central Coast has seen significant temporary employment shifts over the last two years due to the 'stay at home' public health orders imposed by the COVID-19 pandemic. Prior to this, approximately 25% of the coast's residential workforce commuted outside of the region for work. It is yet to be seen if these employment shifts mean an increase in more professional jobs permanently based in the region and what impacts that will have on the economy in the mid to long term.

The Central Coast has growing health and care industries, such as the Gosford healthcare precinct. It is also positioning as a larger education and training centre with the ever-developing Ourimbah Campus, a partnership between the University of Newcastle and Hunter Institute of TAFE, as well as the Gosford and Wyong campuses of Hunter TAFE, and recent announcement by State Government to have an integrated housing and TAFE complex in the Gosford CBD. Additionally, the region supports employment in construction, tourism, retail trade, hospitality and manufacturing.

Maintaining the amenity, natural setting and desired liveability factors of the region, as well as balancing the shift in community expectations of the built environment and supporting local infrastructure places, is an enormous responsibility on Central Coast Council, in order to ensure that residents' interests are served within the financial means and areas of responsibility of the Council.

Council has completed a Service Catalogue which identifies all the services it delivers, for each service there is an overview of the service delivery model outlining the activities delivered. The Service Catalogue is included further in this document.

About the Delivery Program

The Integrated Planning and Reporting (IP&R) Framework promotes integration with community-based objectives and is informed by state-level plans, cascading down through to Council for implementation through its Delivery Program and Operational Plan.

Community Strategic Plan

The Community Strategic Plan (CSP) represents the highest level of strategic planning undertaken by a local council and identifies the main priorities and aspirations of the community, providing a clear set of objectives to achieve this vision. It is a ten-year plan for the future.

Central Coast's inaugural CSP, *One Central Coast*, was adopted in June 2018. However, since its adoption Council's financial situation has significantly changed. The CSP as it stands did not reflect the current community sentiment or acknowledgement of Council's commitment to financial responsibility on behalf of the community. To address this, community engagement feedback sought about Council's financial situation has been analysed to understand what the community is feeling and what the community wants from their Council. Amendments to the CSP, to reflect and acknowledge these, are contained in a revised version. No other changes have been made to the CSP as part of this revision.

There will be comprehensive community engagement and a review of the whole CSP following the local government elections for the Central Coast in 2022.

Delivery Program and Operational Plan

The Delivery Program 2022-2025 (and Operational Plan) detail those actions that Council will take (through projects, programs and other activities) to deliver the Community Strategic Plan (CSP), *One – Central Coast*. Alignment to the CSP is based on the revisions detailed above.

This Delivery Program (including the Operational Plan) covers the 2022-23, 2023-24 and 2024-25 financial years, detailing the three-year plan of priorities and what Council will do with its available resources.

It also shows Council maintaining services at their current levels and this is based on Council's income having the rate maintained at the same level. If Council's income is reduced through a reduction in the level of rates, then Council will need to revise its Delivery Program and reduce and / or stop many services and restructure the organisation from 1 July 2022. To prepare for this scenario Council has completed preliminary work and the proposed service level reductions are outlined further in this document.

Resourcing Strategy

In order to meet service levels and deliver the projects and actions outlined in this document, Council needs to allocate its resources. Council's Resourcing Strategy (provided under separate cover) provides details of how this will be done through its finances, people and assets. The three elements of the Resourcing Strategy are the:

- Long Term Financial Plan – five scenarios have been considered by Council, with three included in the ten year plan, which details financial projections based on key assumptions. The three scenarios include a scenario based on the continuation of the 15% (inclusive of the rate peg) special variation (SV) beyond June 2024, a Baseline Scenario without the SV from the 2024-25 financial year, but maintains loan repayment, service levels, employee costs etc, and a Deteriorate Scenario that assumes the reduction of the SV, but factors in the need to accommodate this by a further restructuring of the organisation and / or reducing or stopping many services.
- Workforce Management Strategy – a four year strategy that details the workforce challenges and opportunities and the actions that will be undertaken to ensure continued service delivery. This Strategy is based on the Maintain SV scenario.
- Revised Asset Management Strategy – a ten year strategy that details Council's asset portfolio and guides the planning, acquisition, operation, maintenance, renewal and disposal of assets. This Strategy is based on the Maintain SV scenario.

Adoption Timeline

As part of IPART's requirements, if Council is to apply for an SV in February 2022, the IP&R elements must be developed and exhibited before an SV application is submitted. This means that exhibition will occur in December 2021 and January 2022 and an extraordinary meeting in early February 2022 will then be held to consider submissions received. If it is resolved that Council will submit the SV application, the IP&R documents will only be adopted for inclusion as part of the SV application.

Given the importance of these documents and to ensure the community is able to view and have their say, the following will occur:

- The CSP is the community's document and while the revisions to the CSP are not considered major, it is still crucial that the community is aware of the proposed amendments and has the opportunity to have their say. As such, a further exhibition is planned for April 2022, with adoption in June 2022.
- As the Delivery Program (and Operational Plan), Long Term Financial Plan, and Workforce Management Strategy don't come into effect until the 1 July 2022, it is likely that changes will be required before this and as such a further exhibition will be undertaken in April 2022, with adoption in June 2022.
- As the amendments to the Asset Management Strategy are considered minor and a comprehensive review is still scheduled for late 2022, it is not envisaged that further updates will be required or that a further exhibition will be required in April 2022. This would mean that adoption of the Revised Asset Management Strategy would occur in June 2022, along with the other IP&R elements above. However, if there is cause to do further updates then exhibition will also occur in April 2022.

Community Strategic Plan Vision and Framework

Belonging

Our community spirit is our strength

A1 Work within our communities to connect people, build capacity and create local solutions and initiatives.

A2 Celebrate and continue to create opportunities for inclusion where all people feel welcome and participate in community life.

A3 Work together to solve a range of social and health issues that may impact community wellbeing and vulnerable people.

A4 Enhance community safety within neighbourhoods, public spaces and places.

Creativity, connection and local identity

B1 Support reconciliation through the celebration of Aboriginal and Torres Strait Islander cultures.

B2 Promote and provide more sporting, community and cultural events and festivals, day and night, throughout the year.

B3 Foster creative and performing arts through theatres, galleries and creative spaces, by integrating art and performance into public life.

B4 Activate spaces and places to complement activity around town centres, foreshores, lakes and green spaces for families, community and visitors.

Smart

A growing and competitive region

C1 Target economic development in growth areas and major centres and provide incentives to attract businesses to the Central Coast.

C2 Revitalise Gosford City Centre, Gosford Waterfront and town centres as key destinations and attractors for businesses, local residents, visitors and tourists.

C3 Facilitate economic development to increase local employment opportunities and provide a range of jobs for all residents.

C4 Promote and grow tourism that celebrates the natural and cultural assets of the Central Coast in a way that is accessible, sustainable and eco-friendly.

A place of opportunity for people

D1 Foster innovation and partnerships to develop local entrepreneurs and support start-ups.

D2 Support local business growth by providing incentives, streamlining processes and encouraging social enterprises.

D3 Invest in broadening local education and learning pathways linking industry with Universities, TAFE and other training providers.

D4 Support businesses and local leaders to mentor young people in skills development through traineeships, apprenticeships and volunteering.

Green

Environmental resources for the future

E1 Educate the community on the value and importance of natural areas and biodiversity, and encourage community involvement in caring for our natural environment.

E2 Improve water quality for beaches, lakes, and waterways including minimising pollutants and preventing litter entering our waterways.

E3 Reduce littering, minimise waste to landfill and educate to strengthen positive environmental behaviours.

E4 Incorporate renewable energy and energy efficiency in future design and planning, and ensure responsible use of water and other resources.

Cherished and protected natural beauty

F1 Protect our rich environmental heritage by conserving beaches, waterways, bushland, wildlife corridors and inland areas, and the diversity of local native species.

F2 Promote greening and ensure the wellbeing of communities through the protection of local bushland, urban trees, tree canopies and expansion of the Coastal Open Space System (COSS).

F3 Improve enforcement for all types of environmental non-compliance including littering and illegal dumping, and encourage excellence in industry practices to protect and enhance environmental health.

F4 Address climate change and its impacts through collaborative strategic planning and responsible land management and consider targets and actions.

We are one Central Coast.
A Smart, Green and Liveable region with a shared sense of Belonging and Responsibility

Responsible

Good governance and great partnerships

- G1** Build strong relationships and ensure our partners and community share the responsibilities and benefits of putting plans into practice.
- G2** Engage and communicate openly and honestly with the community to build a relationship based on trust, transparency, respect and use community participation and feedback to inform decision making.
- G3** Provide strong leadership that is accountable, makes decisions in the best interest of the community and ensures Council is financially sustainable.
- G4** Serve the community by providing great customer experience, value for money and quality services.

Delivering essential infrastructure

- H1** Solve road and drainage problem areas and partner with the State Government to improve road conditions across the region.
- H2** Improve pedestrian movement safety, speed and vehicle congestion around schools, town centres, neighbourhoods, and community facilities.
- H3** Create parking options and solutions that address the needs of residents, visitors and businesses.
- H4** Plan for adequate and sustainable infrastructure to meet future demand for transport, energy, telecommunications and a secure supply of drinking water.

Balanced and sustainable development

- I1** Preserve local character and protect our drinking water catchments, heritage and rural areas by concentrating development along transport corridors and town centres east of the M1.
- I2** Ensure all new developments are well planned with good access to public transport, green space and community facilities and support active transport.
- I3** Ensure land use planning and development is sustainable and environmentally sound and considers the importance of local habitat, green corridors, energy efficiency and stormwater management.
- I4** Provide a range of housing options to meet the diverse and changing needs of the community and there is adequate affordable housing.

Liveable

Reliable public transport and connections

J1 Create adequate, reliable and accessible train services and facilities to accommodate current and future passengers.

J2 Address commuter parking, drop-off zones, access and movement around transport hubs to support and increase use of public transport.

J3 Improve bus and ferry frequency and ensure networks link with train services to minimise journey times.

J4 Design long-term, innovative and sustainable transport management options for population growth and expansion

Healthy lifestyle for a growing community

L1 Promote healthy living and ensure sport, leisure, recreation and aquatic facilities and open spaces are well maintained and activated

L2 Invest in health care solutions including infrastructure, services and preventative programs to keep people well for longer.

L3 Cultivate a love of learning and knowledge by providing facilities to support lifelong learning.

L4 Provide equitable, affordable, flexible and co-located community facilities based on community needs.

Out and about in the fresh air

K1 Create a regional network of interconnected shared pathways and cycle ways to maximise access to key destinations and facilities.

K2 Design and deliver pathways, walking trails and other pedestrian movement infrastructure to maximise access, inclusion and mobility to meet the needs of all community members.

K3 Provide signage, public facilities, amenities and playgrounds to encourage usage and enjoyment of public areas.

K4 Repair and maintain wharves, jetties, boat ramps and ocean baths to increase ease of access and enjoyment of natural waterways and foreshores.

Financial Sustainability

Financial Recovery

Council's financial recovery plan put in place in October 2020 has been successfully executed and Council has met all major milestones and targets in this recovery plan.

Council has implemented cost management measures including structural reduction of staffing by \$30 million, ongoing annual reduction of materials and contracts by \$20 million, capped capital works programs at \$175 million annually, selling at least \$60 million in property assets and made wholesale changes to the management team, implemented tighter budget management controls and productivity improvements. The 2021-22 Q1 budget for operational employee costs is \$172.6 million which is a reduction of \$48.3 million or 21.9% from 2019-20.

Council also had to secure \$150 million in emergency commercial bank loans to reimburse the restricted funds that had been spent unlawfully on projects that the community had benefited from. These loans must be repaid within 10 years.

The cost management measures made up 70% of what Council needed to do to satisfy the external lenders that Council's finances were getting back on track. The other 30% came from the temporary 15% (includes 2% rate peg) rate increase approved by the Independent Pricing and Regulatory Tribunal (IPART) in May 2021 and implemented from 1 July 2021 for three years only, expiring in June 2024.

This is why Council is proposing to apply to IPART in February 2022 to maintain the current ordinary rate for an additional seven (7) years, or ten years in total through to June 2031. Council can then not put at risk its financial sustainability and loan repayment ability and can continue to demonstrate to the commercial lenders that we are able to pay back the loans and maintain the current service levels for the Central Coast community. If the current rates are not maintained beyond this date, Council will have an average annual income loss of \$25.8 million. This means Council will need to reduce or cease many services.

Council's revised Long-Term Financial Plan shows that with a 15% Special Variation (inclusive of 2% rate peg), continuing, Council will be able to stay on its clear path to financial recovery and sustainability and maintain at least the current service delivery for the community.

Diagram 1: Summary of Financial Recovery Plan

Financial Recovery Plan

Securing revenue

Temporary 15% rate increase (\$25m) for 3 years

Maintain the temporary rate 15% for further 7 years

Reducing costs

\$30m employee cost savings

\$20m materials and services savings

\$20m internal restrictions that did not need to be repaid

\$175m capital expenditure capped

on track
30 June
2022

\$60m property asset sales

Go forward plan

New revenue streams

One way = better customer experience

- property and rating system
- public tree service
- outdoor dining
- road, drainage and pavement design
- cemeteries management system
- theatre management system

Many more improvements to help reduce costs and improve services

Productivity Improvements

Significant productivity improvements have also been made through better management of staff time, technological improvements that have transitioned manual processes into digital ones, and better equipment to help staff do their jobs effectively and efficiently.

This means Council has stopped some clunky and inefficient processes. These productivity improvements over a number of years have ensured the necessary cost-cutting measures have meant minimal service reductions for the community. Some of these productivity gains will continue to have an ongoing positive impact on improved service delivery and the community will see the benefits year on year.

Council continues to be committed to reducing the burden on ratepayers and has built into its service delivery model performance improvements across the diverse range of activities.

Situational analysis / Long Term Financial Plan

The Long Term Financial Plan for the next 10 years has been exhibited using three (3) different scenarios. The three (3) scenarios are explained below, in addition to two (2) non-budgeted scenarios with the reasons why, for completeness. The Maintain Special Variation scenario shows Council's income including a continuation of the 15% (including the 2% rate peg) Special Variation, which is aligned with Council's proposal to make an application to the Independent Pricing and Regulatory Tribunal (IPART) in February 2022.

Maintaining the Special Variation of Council's general income beyond the current three-year period for an additional seven years will allow Council to:

- Demonstrate to commercial lenders that Council is able to meet ongoing loan commitments

- Maintain services at least current levels
- Embed further productivity improvements across the organisation
- Establish an ongoing business improvement and service review program.

What are the scenarios

- Baseline scenario – catastrophic / bankruptcy impact. This scenario maintains the current, baseline service levels and keeps the status quo of annual expenditure, while sustaining an unmitigated \$25.8 million annual loss in Special Variation (SV) revenue, which is lost from Council's revenue base at the end of 2023-24. This is a theoretical scenario only and has been presented because of the requirement for Council to show a status quo scenario, meaning maintaining current services at current levels. Council notes this scenario cannot be operationalised because Council cannot sustain seven (7) years of operational deficits, as it has insufficient unrestricted cash buffer to sustain such a protracted loss-making operation. This scenario, however, clearly shows the significant quantum of annual deficits generated by changing nothing, other than losing the annual SV. This scenario is unsustainable and sets Council on a pathway towards a bankruptcy.
- Maintain Special Variation (SV) scenario – financially sustainable impact. This scenario projects the maintenance of the current rate base, which contains the one-off 15% SV that was implemented in 2021-22. This scenario embeds millions of dollars in annual productivity savings by growing annual expenditure at significantly lower levels than inflation. This scenario represents the continuation of the successfully implemented Recovery Plan and it satisfies Council's debt responsibilities associated with the principal and interest repayments of the \$150 million in emergency loans and all other Council debt. The maintenance and/or improvement of current service levels reflects the vast majority of the community sentiment, as canvassed in a statistically representative community survey sample and it represents Council's preferred long-term path to financial sustainability.
- Deteriorate scenario – distressed community impact. This scenario projects a wholesale restructure which results in a significant reduction and / or cessation of many of Council's services in order to compensate for the loss of SV revenue at the end of 2023-24. This scenario compromises the community, Council's service delivery and the community's ability to secure a respectable standard of living by hacking Council into a shadow of its former size and community capability. This scenario is in direct opposition to the vast majority of the community's sentiment who are wanting to maintain or increase current service levels, as canvassed in a statistically representative community survey sample. The impacts of the projected service reductions are outlined in this document under the scenarios to the Delivery Program on page 31. The community and its standard of living will significantly decline, and this would manifest in the deterioration of assets, visual reduced amenity of the Coast, decline in social support and community programs and reduced resourcing capacity of the organisation with flow on impacts to the broader economic profile of the region. This option is not only not reflective of the community's sentiment but also it is not in the best interest of the community.
- Enhance scenario – improved services impact. A scenario projecting for improved and / or increased community services is not forecasted because such a scenario will require a much larger than 15% SV rate increase and taking into consideration the community's anger and frustration surrounding Council's financial situation, a decision was made to only focus on maintaining Council's financial sustainability and securing the emergency loans repayments, rather than forecasting an increase in Council's services, which will cost more.

- Less than seven (7) years extension scenario – community destabilising impact. A scenario projecting another temporary SV application of less than the requested seven (7) years has not been projected as it will limit Council's ability to fix the repayment terms of the emergency loans for the remaining seven (7) years. This indecisiveness will hit a permanent pause for the community and Council's staff, as it will prevent Council from securing its loan repayment capacity and as a result will keep the community and staff on edge to go through another SV application or face major redundancies and service reductions. This is not a conducive landscape for Council and the community to move on.

Our response to the COVID-19 Pandemic

COVID-19 has changed the ways residents utilise Council's services, with many reconnecting with their local places and services during the past 18 months. We know from the Customer Experience Survey in 2020 (*Source: Micromex Research June 2020 Central Coast Council Customer Experience*) that residents identified that the main responsibility of Council during the COVID-19 Pandemic was to provide relevant and up to date communication / information/advice, ensure adherence to and enforce Government advice and keep public spaces clean. Businesses sought mostly the same but with some seeking financial relief e.g. financial packages, rate relief.

Council was viewed as a trusted source of information for the community and the research showed the community valued the helpfulness of information relayed by Council

From the moment the region was impacted by COVID-19 restrictions, Council moved quickly to put a number of measures and resources in place to support businesses and the community, and to help keep the local economy activated, including:

- COVID-19 Outdoor Dining Support Package - to help hospitality venues recover from the devastating effects of COVID-19, Council is offering an Outdoor Dining Expansion Package. The Package enables businesses to expand their outdoor dining areas by up to 50 percent without paying any additional fees for the extra space until 30 April 2022.
- Activating Town Centres - vibrant town centres contribute to the region's economy and are important places for the community to connect.
- Recent targeted initiatives and programs include improvements to the streetscape to improve amenity and safety, community events and activities, pop up activations, interactive street art and connecting creatives and social enterprise with vacant shopfronts to create vibrant spaces.
- Central Coast Economic Development Strategy - in 2020, an Economic Development Strategy for the Central Coast was adopted, positioning the region as the place to do business, creating jobs and prosperity for the region.
- Register to do business with Council - Council continues to use local suppliers where possible and fast-track approval for registered local businesses to be on list of approved suppliers of Central Coast Council. This is vital for the growth and economic stimulus of the region.
- Shop Local Campaign - the #LoveCentralCoast shop local campaign aims to boost business for local retail and tourism businesses located within the Central Coast Region. This program will continue year round.
- Central Coast Economic Task Force - Council partnered with Business NSW, Central Coast Industry Connect, Central Coast Food Alliance and Regional Development Australia (Central Coast) to form the Central Coast Economic Task Force, to harness collective knowledge, support and help the business community connect faster following the impact of COVID-19.

- Bigger Backyard Central Coast – this is a local business support campaign which provides an online platform to showcase the myriad of businesses both small and large on the Coast and encourage businesses to source materials, resource and products locally. By pledging to seek local business suppliers, businesses can play an active role in stabilising the local economy, stimulate jobs and build a stronger Central Coast. Bigger Backyard is a joint initiative of Business NSW (Central Coast), Central Coast Council and local Chambers of Commerce groups – Gosford / Erina, Wyong, The Peninsula and The Entrance.

We know that going forward the community has changed, and Council has seen an increase in:

- Use of local parks and playgrounds
- Buying local and visiting and experiencing local attractions and exploring the coast, and that
- Working from home and purchasing online or using online services is a way of life for many now.

Council had adjusted its approach to service delivery in some areas to accommodate these trends and continue to meet community expectations in the short term about delivery of some services.

Examples are as follows:

- 'Love Local' promotional campaign promoting Central Coast guides to visitors and residents for dining, entertainment, things to do, adventure and nature attractions will continue as part of Council's visitor marketing campaign year round.
- Delivering some library events virtually to enable broader community access to continue following positive take-up by the community whilst library facilities were closed.
- Assessing the impacts of how the community used public free spaces differently and incorporating these needs into future planning.
- Bringing forward the development of a Mountain Bike Plan for the region to address the rapid increase in the take-up of this soft adventure activities and ensure all interests can be appropriately addressed and managed.

Public Inquiry

The NSW Government held a Public Inquiry into Central Coast Council's financial situation with public hearings occurring in October 2021 and a report is pending. This followed the Minister for Local Government appointing an Administrator to Council in October 2020, suspending the councillors and not including Central Coast Council in the recent local government elections.

Administrator Rik Hart has recommended to the recently resigned Minister for Local Government, Shelley Hancock, that the next general election for the Central Coast Council be conducted in late 2022 and be held in conjunction with the Constitutional Referendum, with the results of the Referendum to apply in the 2024 local government elections. The Referendum will ask Central Coast voters to determine the following question: 'Do you favour a reduction in the number of Central Coast Councillors from fifteen to nine?' This will result in three Wards with each Ward electing three Councillors.

Community Engagement

Among the many tools in Council's Community Engagement Program, is the *Your Voice Our Coast* online platform. Depending on the engagement required Council will also undertake Deliberative Forums, Community Reference Groups and work directly with key stakeholders to provide valuable input into planning for improved services and facilities.

Other mechanisms to engage, involve and empower community and key-stakeholders in decision making include pop-ups, Council meetings, community meetings, activation events, focus groups and workshops.

Stage 1 – Securing your future

In December 2020 and January / February 2021, Council consulted extensively with the community on options for new residential and business rates to begin in the 2021-22 financial year. The proposals addressed long term rate equity restrictions associated with the amalgamation (referred to as rate harmonisation) and newly reported financial sustainability issues. The latter included the legal obligation for Council to reimburse the restricted funds that had been spent unlawfully on projects that the community had benefited from.

Over 10,000 community responses to an online survey, telephone survey and direct submissions were received in response to Council's proposal about a new rating structure. The levels of community support and reasons for and against a rate rise were established through this consultation. The majority of respondents did not support the proposal.

More broadly, the engagement process affirmed that the community wanted Council to 'fix the problem', maintain services and create a sustainable pathway forward for Council. The community was supportive of change to see better financial management and accountability put in place. They also wanted to see that they were not shouldering the burden of fixing the problem and that other things were being done as alternatives to a rate increase such as seeking NSW government funds, selling assets, reducing staff, reduction in capital works and scaling back services and expenditure in general.

Rates Equity

From 1 July 2021, former Wyong and Gosford LGA rates were brought together to provide fairness and equity in how rates are charged across the whole of the Central Coast region.

Council has undertaken decisive actions in a relatively short period of time and implemented significant cost management measures without largely impacting on the services delivered for the community. For the full summary of the consultation report, go to: www.yourvoiceourcoast.com

Stage 2 – Maintaining Services and Rates

In July 2021 rates notices were issued to households, communicating that they were impacted by two factors:

- A change to their rates were made permanently consistent across the Central Coast LGA – this meant a reduction in rates for some, and an increase for others – but overall this did not generate any additional income for Council, it was simply the rates being brought together to provide fairness and equity in how rates are charged. The timing of this was driven by amalgamation restrictions and it was outside of Council's control.
- In May 2021 the Independent Pricing and Regulatory Tribunal (IPART) approved a temporary rate increase of 15% (inclusive of the standard 2% rate peg that applies to all Councils) for three years, after which it will be removed and rates will drop.

Information was also communicated on Council's financial recovery, advising this will take much longer than three years and if rates reduce at the end of three years, Council will have an average annual income loss of \$25.8 million for the following seven years. To balance the budget, Council will need more revenue or will need to reduce services levels.

Council wants to understand the community views on what services are important, what are the appropriate service levels and whether or not the community supports maintaining services and rates at current levels beyond the three years approved by IPART. Council's awareness and engagement program to do this commenced in October 2021 and will run through to January 2022. Due to the COVID-19 situation at the time of engagement, large open meetings were not able to be conducted. These were replaced with an open invitation and direct invitations with smaller one on one meetings with the Administrator. These were held with community groups and associations, Chamber of Commerce and individuals. The program has included direct communication to 120,000 ratepayers, online information, community group meetings with the Administrator, representative telephone and online surveys, community online survey, community feedback on services and options through a Community Reference Group and business leaders' feedback on options on services.

To date, residents and ratepayers have told us the following about the options on services:

- 82% of respondents want overall service investment to remain the same or more.
- the individual service that had the highest level of support for service reduction, still had 64% of respondents identifying they wanted the same or more investment for that service
- At its peak, only 36% of respondents identified a particular service that could be reduced. This percentage dropped to 3% across all the service lines i.e. from 36% to 3%.

- 73% of respondents would like to see investment in new assets remain the same (47%) or increase (26%)
- Respondents were split when asked to choose their preference for either extending the existing Special Variation or reducing services. Of the online survey respondents who wanted to reduce services – 31% indicated that they would like Council to invest less on services generally, which means 69% would like Council to invest the same or more on services generally
- 1 in 2 respondents made some comment that Council should be held responsible for its financial situation
- More work can be done to improve the community's overall satisfaction with the quality of services delivered with an average score of 3.31 out of 5

The next steps are that Council has scheduled for December 2021 to January 2022 the public exhibition of the Draft Revised Community Strategic Plan, Draft Resourcing Strategy and Draft Delivery Program. Council will seek community feedback on the draft Delivery Program that proposes to maintain services at the same level. Information showing the change to services and income, should the current rates not be maintained, is also shown.

The final step in this stage is that the Council will consider the community feedback about these strategic plans in February 2022 and make a decision about whether or not to formally make a submission to IPART.

Stage 3 – Community Consultation Results

The results of the community awareness and engagement program and public exhibition in December 2021 and January 2022 is summarised in the table below:

Document / Project	YVOC* visits	Max visits per day	YVOC document downloads	Submissions Received	
				YVOC	Other means (Ask / Post)
Revised Community Strategic Plan	35	7	105	14	2**
Delivery Program (including Operational Plan) and Fees and Charges	60	12	173	33	5**
Resourcing Strategy	26	6	69	12	0
Maintaining Services and Rates	1052	235	160	N/A	N/A
Total:				59	7
				66 received in total	

* YVOC – Your Voice Our Coast (Council's online engagement platform)

** 2 late submissions were received in total. These were accepted and considered along with all the submissions.

A summary of the of submissions and matters raised include:

- Support for the Special Variation
- Objections to the Special Variation
- Suggestions / Comments on the overall CSP, including wording changes / inclusions to the Objectives, layout and format of the document
- Concerns for the service levels and need to ensure they are maintained
- Commentary on accountability and transparency
- Comments on alternative solutions / scenarios
- General queries / comments on Council functions
- Request for projects to be brought forward or for additional projects and activities to be included
- Questions and comments of Fees and Charges to be included or reduced / restructured

Consideration of Submissions

Amendments to the Delivery Program and Resourcing Strategy have been made based on community feedback. These are to provide better clarity on the matters raised as well as a result of internal review.

As the Delivery Program does not come into effect until 1 July, there is likely going to be a need to make amendments based on new information coming to light. This will be done with consideration to the feedback that the community has already provided. A further exhibition is planned for April 2022.

All submissions and Council's response is included in the Council Report for the 3 February 2022.

Delivery Through Services

Central Coast Council has emerged from a critical financial crisis that has seen the organisation in a relatively short, twelve-month period get to a sustainable financial footing through a planned, deliberate and non-negotiable program of financial recovery actions. This has not been without discomfort for the community, employees, ratepayers and residents.

The organisation's focus now is to secure its ongoing revenue, stabilise its workforce, optimise the service delivery and get itself ready to successfully transition out of administration.. This means Council is continuing to deliver on its responsibilities in the Community Strategic Plan and the many separate activities that Council provides for residents, ratepayers, workers and visitors.

Council has built into its service delivery model, performance improvements across its diverse range of activities. For example, the implementation of a Customer Journey Mapping program, improved accessibility to information on services, improved responsiveness to customer enquiries and improved customer experience of the website. Other activities include improving the performance and return from commercial leases and licences.

Council will inform the community about these and other performance improvements and where required consult on changes to services, reporting annually on activities through the Annual Report.

Delivery Program

2022-23 to 2024-25

Scenarios to the Delivery Program

This Delivery Program (including Operational Plan) covers the 2022-23, 2023-24, 2024-25 financial years and has been prepared based on following scenarios:

Baseline Scenario

Baseline scenario – catastrophic impact. General Fund revenue and expenditure forecasts which retain the status quo with the current 15% Special Variation (SV) concluding in 2023-24 and rate peg only applied onwards. This scenario has no adjustments to the Delivery Program or service delivery to reflect the income reduction. This is a theoretical scenario only and has been presented because of the requirement for Council show a status quo scenario. Council notes this scenario would mean requiring Council to operate unlawfully and as such is presented in the LTFP only.

Maintain SV Scenario

Special Variation scenario – sustainable impact. General Fund revenue and expenditure forecasts which propose the current 15% SV (including rate peg) is maintained in the rate base over seven (7) years. This means that the rate of 15% continues to June 2031. This scenario maintains revenues and Council can continue to reduce its expenditure through efficiency gains and cost savings with moderate adjustments to service levels. Service levels would also be maintained, with details of those service listed in the Service Catalogue.

The Delivery Program on the following pages details the actions, projects and KPIs that will be delivered if the SV is maintained. Where the Reference number has ** next to, this indicates that it would be impacted if the SV is not maintained.

Deteriorate Scenario

Deteriorate scenario – distressed impact. General Fund revenue and expenditure forecasts which reflect the current 15% SV concluding in 2023-24 and a distressed impact due to a wholesale restructure and resultant reduction in service levels. This means revenue is reduced and Council will need to reduce or cease many services to meet that shortfall of \$25.8 million. Council has considered how to address that and not all these changes align to the community feedback. Community feedback on those services that could be reduced, as to those that are required to be maintained or have more investment, has been analysed and there would still be a significant shortfall to reaching the target needed.

The following is an example of what the proposed service level changes would be to meet the target.

Service	CSP Theme	Proposed Service Level Change
<ul style="list-style-type: none"> Community Grants and Sponsorships Community Education 	Belonging	<ul style="list-style-type: none"> Reducing annual funding for some partnerships and community education programs Reducing community grants
<ul style="list-style-type: none"> Beach Safety 	Belonging	<ul style="list-style-type: none"> Reducing patrols at some beaches and baths

Enhance Scenario

Enhance scenario - improved services impact. A scenario projecting for improved and / or increased community services is not forecasted because such a scenario will require a much larger than 15% SV rate increase and taking into consideration the community's anger and frustration surrounding Council's financial situation, a decision was made to only focus on maintaining Council's financial sustainability and securing the emergency loans repayments, rather than forecasting an increase in Council's services, which will cost more.

Less than Seven (7) years Extension Scenario

Less than seven (7) years extension scenario – community destabilising impact. A scenario projecting another temporary SV application of less than the requested seven (7) years has not been projected as it will limit Council's ability to fix the repayment terms of the emergency loans for the remaining seven (7) years. This indecisiveness will hit a permanent pause for the community and Council's staff, as it will prevent Council from securing its loan repayment capacity and as a result will keep the community and staff on edge to go through another SV application or face major redundancies and service reductions. This is not a conducive landscape for Council and the community to move on.

Strategies

The following strategic documents underpin this Delivery Program.

Affordable and Alternative Housing Strategy

Disability Inclusion Action Plan

Biodiversity Strategy

Graffiti Management Strategy

Sustainability and Climate Action Plan

Positive Aging Strategy

Draft Destination Management Plan

Youth Strategy

How to Read the Delivery Program

The Delivery Program (and Operational Plan) is aligned to the five Themes of the Community Strategic Plan (CSP) and links to the Focus Areas and Objectives. It also includes the list of services delivered under the CSP Theme. The Themes and Focus Areas are:

The Delivery Program includes the actions, projects and KPIs that will be delivered in the 2022-23 (which is the Operational Plan), 2023-24 and 2024-25 financial years. The diagram below details how to read the Delivery Program tables.

CSP Objective that the action, project or KPI links to

Objective: Promote and grow tourism that celebrates the natural and cultural assets of the Central Coast in a way that is accessible, sustainable and eco-friendly

Service Description

- Australia Day Awards
- Lighting of the Christmas tress
- School Holiday events

Service Activity

Holiday Parks

Provision and operation of holiday parks and campgrounds, with more than 1,600 sites across 5 locations, including:

- Norah Head Holiday Park
- Toowoon Bay Holiday Park
- Canton Beach Holiday Park
- Budgewoi Holiday Park
- Patonga Campground

Activities include:

- Contract management and administration
- Inspections, maintenance and upgrades of park facilities and grounds
- Managing permanent residency agreements

Major Economic Projects

Provision of transformational projects to facilitate economic development

Activities include:

- Concept design and feasibility studies
- Economic profiling and forecasting
- Project management
- Partnering and collaborating with Federal and State Government and other industry bodies

Town and City Centre Management

Provision of clean and attractive town centres

Activities include:

- Inspections, maintenance and upgrades of town centre assets such as benches, fountains, stages / entertainment areas, pedestrian paved areas etc
- Cleaning
- Security patrols of key town centres such as The Entrance, Gosford, Woy Woy and Terrigal
- Place-making programs and initiatives such as bin hutch designs, seasonal flag changing etc

Visitor Economy

Promote the Central Coast as a destination for the visitor economy and support the growth of the local tourism industry in line with the Destination Management Plan and Tourism Opportunity Plan

Activities include:

- Liaison with external government agencies, stakeholders, industry representatives and local operators
- Liaison with media and advertising buying agencies
- Campaign design, content creation, rollout and evaluation.

Environmental Resilience and Recovery

Green – F

Responsible – G

Service Description	Service Activity
Natural Disaster Impact Mitigation	
Provision of planning and mitigation measures to reduce the impacts of natural disasters on the community	<p>Activities include:</p> <ul style="list-style-type: none"> • Management and coordination of the Local Emergency Management Committee • Management and maintenance of the Emergency Operations Centre • Management and coordination during an emergency situation including dissemination of information, triaging and dispatching of crews, undertaking clean-up and recovery operations • Flood planning including flood studies, mapping and development of Floodplain Risk Management Plans

Libraries

Liveable – L

Service Description	Service Activity
Libraries	
<p>Provision of access to information, literature and technology through branch, online and mobile libraries. Branch operations range from Monday to Saturday, 9.30am to 4.30pm, at:</p> <ul style="list-style-type: none"> • Bateau Bay • Lake Haven • Tuggerah • Toukley • Kariong • Woy Woy • Umina • Erina • Gosford • Kincumber 	<p>Activities include:</p> <ul style="list-style-type: none"> • Physical and digital library collections, lending, information and research services • Preservation of local heritage materials • Access to information technology resources, • Literacy and lifelong learning programs and events that support literacy and lifelong learning • Customer service functions

Natural Assets

Green – E & F

Service Description	Service Activity
Beach Management	
Provision of clean and accessible beaches, which include 80km of coastline and 200 beach accessways	<p>Activities include:</p>

Service Description

Service Activity

- Beach cleaning and dune care (Monday to Friday, 2 to 3 times a week for high-use beaches and 2 times a week for medium-use)
- Maintenance of structures, accessways, fencing, signage, disabled beach matting as well as responding to environmental incidents

Biodiversity

Provision of evidence-based planning and the implementation of targeted actions to minimise the threats to biodiversity

Activities include:

- Monitoring of vegetation condition across 71 natural asset reserves
- Development and implementation of Biodiversity Strategy actions to protect and manage natural reserves such as vegetation and corridor mapping, bush regeneration, habitat restoration, environmental land acquisition etc
- Monitoring of flying fox camps and Little Tern population

Biosecurity

Provision of biosecurity measures to minimise the environmental impacts of plants, animals and other organisms (including fungi) of the environment

Activities include:

- Weed inspections on land including Council land, private land, state government land, and business premises such as nurseries and agricultural production land
- Implementation of targeted programs and actions to control priority weeds and control pest animals

Environmental and Sustainability Education

Provision of community learning on the value and importance of the natural environment

Activities include:

- Development and implementation of various education programs such as workshops, tours and other hands-on events
- Management and coordination of the environmental volunteering program which includes 682 volunteers across 80 volunteer groups

Natural Bushland Reserves

Provision of bush fire mitigation and management of over 6,000 hectare of bushland reserves and other natural reserves in the Coastal Open Space System (COSS). This includes:

- Picnic areas
- Walking tracks
- Looks outs
- Asset Protection Zones (234)
- Fire Trails (220)

Activities include:

- Inspections and vegetation maintenance and litter removal of bushland and natural reserves (every 3 weeks in summer and 6 weeks in winter for high-use areas)
- Bushfire mitigation inspections, maintenance and fuel load reduction (4 times a year)

Tree Management

Service Description

Provision of tree risk assessment to ensure trees on public land do not pose a risk to the community

Service Activity

Activities include:

- Inspections and assessment (around 5,000 a year)
- Tree pruning and removal

Waterways and Coast

Provision of planning, management and protection of waterways coasts, including:

- 80kms of coastline
- 3 major estuary systems (Hawkesbury River, Brisbane Water, Tuggerah Lakes, Southern Lake Macquarie, including their catchments within the LGA)
- 5 coastal lagoons (Wamberal, Terrigal, Avoca, Cockrone, Pearl Beach)

Activities include:

- Coastal and estuary planning such as review of existing and development of new Coastal Management Programs, scientific research and monitoring of coastal and estuary areas
- Coastal and estuary project delivery such as foreshore upgrades, wetland and saltmarsh works, Clean4Shore, sand nourishment etc
- Coastal and estuary monitoring such as coastal area LIDAR and drone monitoring of beach widths and sand volume, flood mitigation and monitoring of lagoon entrances and The Entrance channel (dredging undertaken every 12 to 18 months, depending on conditions), wetland mapping, wrack and algae collection (around 7,000m³ collected each year), GPT maintenance and collection (around 750T of material collected each year)
- Water quality monitoring and reporting such as recreational waters (Beachwatch – 32 sites monitored weekly in summer and monthly in winter), ecological monitoring of estuaries (monthly), catchment audit monitoring to identify sources of pollution, development of an annual waterways report and submission of data to State Government

Sports, Leisure and Fitness

Belonging – A

Liveable – K & L

Service Description

Beach Safety

Provision of beach safety with patrols, safety messaging and Surf Life Saving partnership delivered across the following locations:

- Lakes Beach
- Soldiers Beach
- North Entrance
- The Entrance
- Toowoyn Bay
- Shelly Beach
- Wamberal
- Terrigal
- North Avoca

Service Activity

Activities include:

- Lifeguard patrols and rescues (from September to April, 9am to 5pm)
- Grant McBride Baths patrols (September to April, 9am to 5pm in the summer and May to August 8am to 1pm in the winter)
- Asset inspections of lifeguard towers, fleet equipment and rescue equipment
- Safety messaging, including rock fishing
- Patrolling The Entrance channel during high risk periods

Service Description

- Avoca Beach
- Copacabana
- MacMasters
- Killcare
- Ocean Beach
- Umina
- Budgewoi
- Grant McBride Baths

Service Activity

- Shark mitigation strategies

Boat Ramps

Provision and maintenance of recreational aquatic infrastructure. This includes:

- 56 boat ramps
- 68 jetties
- 12 swimming enclosures
- 3 rock pools

Activities include:

- Inspection (every 3 months)
- Maintenance, cleaning and repairs

Leisure Centres and Pools

Provision of leisure centres, swimming pools, and programs to promote healthy living, operating a range of 5 to 7 days a week, from 6am to 8pm. This includes:

- Niagara Park Stadium
- Gosford Olympic Pool
- Toukley Aquatic Centre
- Wyong Olympic Pool
- Lake Haven Rec Centre
- Peninsula Leisure Centre

Activities include:

- Programs (swimming lessons, fitness classes, sports sessions)
- Creche (child minding)
- Café and retail operation
- Facility and pool upgrades and maintenance

Parks and Playgrounds

Provision and maintenances of playgrounds and the provision of litter collection, mowing and vegetation maintenance for parks and reserves. This includes:

- 264 playgrounds
- 489 parks and reserves
- 117 barbecues
- 14 fish tables

Activities include:

- Playground upgrades / renewals and maintenance
- Vegetation mowing and maintenance for parks and reserves (3 weeks in peak growth period and every 5 weeks in low growth period)
- Litter collections for parks and reserves, including skate parks
- Other maintenance such as fish table cleaning, barbecue cleaning and asset repairs

Sportsgrounds

Provision and maintenances of sports fields, skate parks, BMX tracks and hardcourts such as netball, basketball and tennis. This includes:

- 84 sport fields and facilities
- 4 BMX tracks
- 63 netball courts
- 43 basketball courts
- 29 tennis courts

Activities include:

- Litter collection
- Safety inspections
- Playing surface maintenance
- Field mowing (ranging once a week to twice a week), surround mowing and edging (every 5 weeks)
- Fertilising and pesticide application
- Tree maintenance
- Furniture and fencing repair

Service Description**Service Activity**

- Seasonal changeovers
- Car park maintenance
- Turf amendments consist of aeration, thatch removal, soil conditioners, top dressing, line marking and oversewing.

Stormwater Drainage**Responsible – H****Service Description****Service Activity****Drainage Network**

Provision and management of an integrated, safe and serviceable stormwater drainage network of about 1100 km and supporting infrastructure including detention basins and prescribed dams

Activities include:

- Design and construction
- Scheduled and reactive maintenance
- Asset inspections

Strategic Urban Planning**Responsible – G, H & I****Green – E & F****Smart – C****Belonging – B****Liveable – J****Service Description****Service Activity****Contribution Plans**

Provision of developer contributions plans, processes and funds

Activities include:

- Review and update and / or develop contribution plans
- Provide advice and respond to enquiries
- Financial reporting

Urban Planning

Provision of strategic land use planning for the LGA

Activities include:

- Maintain and update key land use planning documents such as Local Environmental Plan and Development Control Plan
- Develop and implement long term strategic land-use planning projects
- Process planning proposals
- Provide expertise and advise to customers and state agencies

Transport Network

<p>Provision and management of an integrated, safe and serviceable pathway network of almost 900km of off-road shared pathways, cycleways, pedestrian underpasses and boardwalks</p>	<p>Activities include:</p> <ul style="list-style-type: none"> • Design and construction • Scheduled and reactive maintenance • Asset inspections
Street Lighting	
<p>Provision and maintenance of street and road related lighting as a contribution towards the safety of motorists and pedestrians</p>	<p>Activities include:</p> <ul style="list-style-type: none"> • Managing requests for new lights and lights on existing poles • Provision of glare shields • Service and energy consumption charges • Maintenance street lighting • Assessment and determination of lighting levels in accordance with Australian Standards • Assessment and participation in energy saving schemes and innovative network improvements
Street Scapes	
<p>Provision of a safe roadside environment and vegetation maintenance along:</p> <ul style="list-style-type: none"> • Central Coast Highway – 69 sites • Laneways – 520 sites • Pacific Highway – 32 sites • Roadside landscapes – 130 sites • Rural boom – 211 sites • Rural slasher – 142 sites 	<p>Activities include:</p> <ul style="list-style-type: none"> • Vegetation maintenance such as mowing, brush cutting, pesticide application, rural road slashing • Maintenance of signage, linemarking and other traffic facilities such as roundabouts, medians, pedestrian refuges

Service Description

- Town garden – 45 sites
- Wyong Road – 65 sites

Service Activity

Traffic and Safety Regulation

Provision of road safety devices and infrastructure to support and improve safe movement of traffic

Activities include:

- Analysis and investigations of traffic issues relating to pedestrians, cyclists, vehicular traffic and freight
- Implementation of measures to improve road safety
- Programs and initiatives aimed at providing a safe and efficient road network
- Community education on road safety

Wharves and Jetties

Provision of mooring facilities and access for watercraft users

Activities include:

- Design and construction
 - Scheduled and reactive maintenance
 - Asset inspections
-

Waste Services

Green – E & F

Responsible – G

Service Description	Service Activity
Public Place Waste Management	
Provision of public space litter bins infrastructure and servicing to reduce litter and improve amenity	Activities include: <ul style="list-style-type: none">• Collection, emptying and maintenance of public waste litter bins
Resource Recovery	
Provision of resource recovery solutions to expand the diversion of waste from landfill. Landfill locations include: <ul style="list-style-type: none">• Buttonderry Waste Management Facility• Woy Woy Waste Management Facility	Activities include: <ul style="list-style-type: none">• Development and implementation of innovative solutions• Establishing appropriate contracts to delivery resource recovery initiatives• Asset maintenance and upgrades of waste management facilities
Waste and Recycling Collection	
Provision of reliable, safe, cost effective and environmentally responsible domestic and commercial waste collection	Activities include: <ul style="list-style-type: none">• Collection, emptying and maintenance of domestic waste bins, including general waste, recyclable waste, vegetation waste and bulk waste collections

Water and Sewer

Responsible – H

Service Description	Service Activity
Water Supply and Sewer Treatment	
Provision of quality drinking water and responsible sewer services. This includes supply 85 million litres of drinking water daily and treatment of 87 million litres of sewage daily.	Activities include: <ul style="list-style-type: none">• Water quality monitoring• Laboratory testing• Network inspections• Maintenance and upgrade works

Support Services

Corporate Communications

Service Activity

Activities include:

- Administration and review of the Procurement Framework
 - Governance and support for purchasing and supply of goods and services
 - Vendor and supplier management
 - Procurement system administration
 - Corporate contract administration
 - Logistics and supply chain support
-

Financial Information

Financial Summary

Overview

Council's financial recovery plan put in place in October 2020 has been successfully executed and Council has met all major milestones and targets in this recovery plan.

Council has implemented cost management measures including structural reduction of staffing by \$30 million, ongoing annual reduction of materials and contracts by \$20 million, capped capital works programs at \$175 million annually, selling at least \$60 million in property assets and made wholesale changes to the management team, implemented tighter budget management controls and productivity improvements. In 2019-20 Council's actual audited operational employee costs totalled \$220.9 million. The 2021-22 Q1 budget for operational employee costs is \$172.6 million which is a reduction of \$48.3 million or 21.9% from 2019-20.

Council also had to secure \$150 million in emergency commercial bank loans to reimburse the restricted funds that had been spent unlawfully on projects that the community had benefited from. These loans must be repaid within 10 years.

The cost management measures made up 70% of what Council needed to do to satisfy the external lenders that Council's finances were getting back on track. The other 30% came from the temporary 15% (includes 2% rate peg) rate increase approved by the Independent Pricing and Regulatory Tribunal (IPART) in May 2021 and implemented from 1 July 2021 for three years only, expiring in June 2024.

This is why Council is proposing to apply to IPART in February 2022 to maintain the current ordinary rate for an additional seven (7) years, or ten years in total through to June 2031. Council can then not put at risk its financial sustainability and loan repayment ability and can continue to demonstrate to the commercial lenders that we are able to pay back the loans and maintain the current service levels for the Central Coast community. If the current rates are not maintained beyond this date, Council will have an average annual income loss of \$25.8 million. This means Council will need to reduce or cease many services.

Council's revised Long-Term Financial Plan shows that with a 15% Special Variation (inclusive of 2% rate peg), continuing, Council will be able to stay on its clear path to financial recovery and sustainability and maintain at least the current service delivery for the community.

Diagram 1: Summary of Financial Recovery Plan

Financial Recovery Plan

Securing revenue

Temporary 15% rate increase (\$25m) for 3 years

Maintain the temporary rate 15% for further 7 years

Reducing costs

\$30m employee cost savings

\$20m materials and services savings

\$20m internal restrictions that did not need to be repaid

\$175m capital expenditure capped

on track
30 June
2022

\$60m property asset sales

Go forward plan

New revenue streams

One way = better customer experience

- property and rating system
- public tree service
- outdoor dining
- road, drainage and pavement design
- cemeteries management system
- theatre management system

Many more improvements to help reduce costs and improve services

Productivity Improvements

Significant productivity improvements have also been made through better management of staff time, technological improvements that have transitioned manual processes into digital ones, and better equipment to help staff do their jobs effectively and efficiently.

This means Council has stopped some clunky and inefficient processes. These productivity improvements over a number of years have ensured the necessary cost-cutting measures have meant minimal service reductions for the community. Some of these productivity gains will continue to have an ongoing positive impact on improved service delivery and the community will see the benefits year on year.

Council continues to be committed to reducing the burden on ratepayers and has built into its service delivery model performance improvements across the diverse range of activities.

Situational analysis / Long Term Financial Plan

The Long Term Financial Plan for the next 10 years has been exhibited using three (3) different scenarios. The three (3) scenarios are explained below, in addition to two (2) non-budgeted scenarios with the reasons why, for completeness. The Maintain Special Variation scenario shows Council's income including a continuation of the 15% (including the 2% rate peg) Special Variation, which is aligned with Council's proposal to make an application to the Independent Pricing and Regulatory Tribunal (IPART) in February 2022.

Maintaining the Special Variation of Council's general income beyond the current three-year period for an additional seven years will allow Council to:

- Demonstrate to commercial lenders that Council is able to meet ongoing loan commitments

- Maintain services at least current levels
- Embed further productivity improvements across the organisation
- Establish an ongoing business improvement and service review program.

What are the scenarios

- Baseline scenario – catastrophic / bankruptcy impact. This scenario maintains the current, baseline service levels and keeps the status quo of annual expenditure, while sustaining an unmitigated \$25.8 million annual loss in Special Variation (SV) revenue, which is lost from Council's revenue base at the end of 2023-24. This is a theoretical scenario only and has been presented because of the requirement for Council to show a status quo scenario, meaning maintaining current services at current levels. Council notes this scenario cannot be operationalised because Council cannot sustain seven (7) years of operational deficits, as it has insufficient unrestricted cash buffer to sustain such a protracted loss-making operation. This scenario, however, clearly shows the significant quantum of annual deficits generated by changing nothing, other than losing the annual SV. This scenario is unsustainable and sets Council on a pathway towards a bankruptcy.
- Maintain Special Variation (SV) scenario – financially sustainable impact. This scenario projects the maintenance of the current rate base, which contains the one-off 15% SV that was implemented in 2021-22. This scenario embeds millions of dollars in annual productivity savings by growing annual expenditure at significantly lower levels than inflation. This scenario represents the continuation of the successfully implemented Recovery Plan and it satisfies Council's debt responsibilities associated with the principal and interest repayments of the \$150 million in emergency loans and all other Council debt. The maintenance and/or improvement of current service levels reflects the vast majority of the community sentiment, as canvassed in a statistically representative community survey sample and it represents Council's preferred long-term path to financial sustainability.
- Deteriorate scenario – distressed community impact. This scenario projects a wholesale restructure which results in a significant reduction and / or cessation of many of Council's services in order to compensate for the loss of SV revenue at the end of 2023-24. This scenario compromises the community, Council's service delivery and the community's ability to secure a respectable standard of living by hacking Council into a shadow of its former size and community capability. This scenario is in direct opposition to the vast majority of the community's sentiment who are wanting to maintain or increase current service levels, as canvassed in a statistically representative community survey sample. The impacts of the projected service reductions are outlined in this document under the scenarios to the Delivery Program on page 31. The community and its standard of living will significantly decline, and this would manifest in the deterioration of assets, visual reduced amenity of the Coast, decline in social support and community programs and reduced resourcing capacity of the organisation with flow on impacts to the broader economic profile of the region. This option is not only not reflective of the community's sentiment but also it is not in the best interest of the community.
- Enhance scenario – improved services impact. A scenario projecting for improved and / or increased community services is not forecasted because such a scenario will require a much larger than 15% SV rate increase and taking into consideration the community's anger and frustration surrounding Council's financial situation, a decision was made to only focus on maintaining Council's financial sustainability and securing the emergency loans repayments, rather than forecasting an increase in Council's services, which will cost more.

- Less than seven (7) years extension scenario – community destabilising impact. A scenario projecting another temporary SV application of less than the requested seven (7) years has not been projected as it will limit Council's ability to fix the repayment terms of the emergency loans for the remaining seven (7) years. This indecisiveness will hit a permanent pause for the community and Council's staff, as it will prevent Council from securing its loan repayment capacity and as a result will keep the community and staff on edge to go through another SV application or face major redundancies and service reductions. This is not a conducive landscape for Council and the community to move on.

Please note that the financial information presented below is subject to rounding.

Financial Income

Operating Income

Council is budgeted to receive \$636.5 million in operating income in 2022-23.

Sources of Revenue

Council's rates, annual charges, and user charges and fees make up approximately 89% of Council's total operating revenue. These amounts are applied in accordance with the relevant legislation and are explained in detail below.

Rates

The total amount of ordinary and special rates Council can levy is defined by legislation. Rates income is regulated by the Office of Local Government, which uses a rate peg system to allow Councils to recover income from the community to deliver services. Rate pegging has been in place since 1977. In 2011, the responsibility for determining the annual rate pegging increase was delegated to the Independent Pricing and Regulatory Tribunal (IPART). Under the rate pegging system, Councils can only increase certain rates and charges by the maximum approved annual percentage allowed by IPART. Councils can apply to IPART to increase their rates income above the rate cap limit. As part of addressing the financial crisis, Council received approval for a three-year increase to ordinary and special rates income of 15% (including the rate peg) for the period 1 July 2021 to 30 June 2024. Council needs to maintain that rates income beyond the three year approval period in order to secure the revenue necessary to meet its debt repayment obligations for its \$150 million in emergency loans and other existing debt, without further deteriorating the service levels for the community and is

applying to IPART for the maintenance of its current level of ordinary and special rates to continue for another 7 years from 1 July 2024.

During 2021 IPART completed a review of the local government rate peg system to include population growth. This is because the amount Councils currently receive in rates is usually not enough to cover the increased costs associated with population growth. From 2022-23 IPART's rate pegging methodology will enable Councils to maintain per capita general income over time as their populations grow. Maintaining per capita general income will help Councils to maintain existing service levels and provide the services their growing communities expect. The rate peg for each Council will be increased by a population factor equal to the annual change in its residential population, using Australian Bureau of Statistics data, with an adjustment for income derived through supplementary valuations. For 2022-23 IPART approved a rate peg of 1.0% as the allowable increase in Councils permissible rates income.

Under the *Valuation of Land Act 1916* Council is required to use the most current land values when calculating ordinary and special rates. These values are provided by the NSW Valuer General (VG), the independent statutory authority responsible for determining land values in NSW. The latest values provided by the VG are being used for levying rates in 2022-23 and have a base date of 1 July 2019.

Annual Charges

Water, Sewerage and Stormwater Drainage Service Charges

Central Coast Council's water, sewerage and stormwater drainage services and a number of its associated ancillary services are levied under the *Water Management Act 2000*. Those services are declared monopoly services under s. 4 of the *Independent Pricing and Regulatory Tribunal Act 1992*.

Council's prices must therefore be set in accordance with any IPART determined methodologies and/or maximum prices and are subject to approval by the relevant Minister.

Council's current IPART determination for water, sewerage and stormwater services expires on 30 June 2022. It was a three year determination and applied from 1 July 2019.

IPART is currently reviewing the maximum prices that Central Coast Council can charge for its water, sewerage, stormwater and other water-related services from 1 July 2022. Council submitted its pricing proposal to IPART on 10 September 2021, and IPART released its Issues Paper on 28 September 2021. IPART will assess whether the price changes proposed by Council represent fair value for money for customers and are affordable. Council proposed prices that would increase typical household water, sewerage and stormwater drainage service charges bills by about 34% in the first year, and then by inflation after that. The proposed price increases will ensure Council can provide water services that meet customers' expectations now and into the future. This includes good quality drinking water, and reliable water supply, sewerage, stormwater and other water services.

IPART will undertake a comprehensive, transparent and consultative water price review process to consider all relevant information and make an independent, fair decision about the new prices that

will apply from 1 July 2022. Financial information included in this Draft Operational Plan reflects Council's pricing submission to IPART. The final adopted 2022-23 Operational Plan will be updated to align to IPART's final pricing determination that is expected to be received in May 2022.

Domestic Waste Management Charge

Central Coast Council provides domestic waste management services including weekly domestic waste (red) bin collection, alternate fortnightly recycling (yellow) and vegetation (green) bin collection and six free kerbside collections per year.

Any amounts charged to residents for the domestic waste management service is "restricted for purpose", which means Council can only recover the cost of providing the service from residents without any profit. Any unspent funds must be restricted and used only to pay for the costs of providing domestic waste management services. The charge calculated beyond is based on the full recovery of the service, including appropriate charges for the Domestic Waste tipping fees at Councils Waste Management facilities. The Waste Facility tipping charge includes pricing for future capital costs associated with management of the facility, long term site remediation and environmental levies for landfill. The future charges could also be impacted by the changes to the long term cost of the landfill and recycling activities.

User Charges and Fees

This category of income represents a user pay system and relies wholly on demand. It includes both statutory charges, where the price is set by regulation and Council determined charges, where the fee is set to reflect market rates and/or contribute towards the cost recovery of providing the service. Examples of both types of fees and charges include water usage charges, sewer user charges, waste facility fees, holiday park user charges, child care fees, Roads and Maritime Services (RMS) user charges, development application fees, community facility hire fees, building and shop inspections, construction certificates and companion animal registrations.

Council sets other fees and charges based on partial (subsidised) cost recovery, full cost recovery or subject to market forces. Pricing categories are disclosed against each fee in the Fees and Charges schedule appearing in Fees and Charges section of the Operational Plan.

Interest and Investment Revenue

Council's investments are made in accordance with the *Local Government Act 1993*, the *Local Government (General) Regulation 2005*, Council's Investment Policy, the Ministerial Investment Order issued in 2011 and the Office of Local Government Investment Policy Guidelines published in 2010.

Council invests cash in fixed rate term deposits with Approved Deposit Institutions, keeping risk low while at the same time securing ongoing returns.

Interest rates have been low in historical terms since 2010-2011 and therefore the Long Term Financial Plan (LTFP) has adopted a conservative stance and assumes a stable interest rate over the next few

years consistent with recent yields. The amount of interest revenue calculated in the LTFP is directly linked to the available cash balances from the cash flow statement.

Other income in this category relates to interest imposed on overdue rates and charges. Further information on the rate of interest payable on overdue rates and charges can be found in the *Statement of Revenue* section of the Operational Plan.

Operating and Capital Grants

Operating grants are provided to Council to fund the delivery of services. Some of the grants are for the delivery of specific services and others are general grants or “untied” grants which means Council can use the funding based on local priorities.

Income received for specific purpose means that it is restricted in use and cannot be used for any purpose other than that identified in the funding agreement. This income is kept as a separate cash reserve until such time as the expenditure occurs. Common examples of specific purpose grants received by Council include roads, bushfire prevention, waste and recycling, child care, library services and recreational facilities.

Each specific purpose grant has been considered individually for the LTFP and only those that have been ongoing in recent years have been included as recurrent future income e.g. street lighting. Many of the specific purpose grants received by Council are capital and non-recurrent in nature. Capital grants are provided to Council to fund renewal or upgrade works on Council assets or for the purchase or construction of new assets. Capital grants are reflected in Council’s budget when the grant funding has been confirmed as approved by an external grant funding body. During the financial year as part of Council’s quarterly budget reviews any new capital grants confirmed will be reflected in the latest financial forecast.

Financial Assistance Grants

The Federal Government provides the Financial Assistance Grant (FAG) program to local government under the *Local Government (Financial Assistance) Act 1995* (Commonwealth). The FAG program consists of two components:

- A general purpose component which is distributed between the states and territories according to population (i.e. per capita basis)
- An identified local road component which is distributed between the states and territories according to fixed historical shares.

Both components of the grant are untied in the hands of local government, allowing Councils to spend the grants according to local priorities.

The NSW Local Government Grants Commission recommends the distribution of the funding under the FAG program to NSW local governing bodies in accordance with the *Local Government (Financial Assistance) Act 1995* (Commonwealth) and the National Principles for allocating grants. The grant is paid in equal quarterly instalments by the Australian Government to the NSW Local Government

Grants Commission for immediate distribution to local governing bodies in August, November, February and May each year.

Historically there has been a prepayment of the FAG to Councils in June each year to support Council to deliver essential services. As the 2022-23 federal budget has not been released at the time of the development of Council's budget (it will be announced in May 2022) we have budgeted for the full 2022-23 estimated FAG. At this time no change has been proposed for the timing of FAG payments in 2022-23. Any changes to the timing of the FAG will be reflected in the quarterly budget review process. The prepayment of the FAG impacts the timing of when the income is recognised (in which financial year) but does not impact the amount which Council receives overall to fund essential services.

Other Revenue

Other sources of revenue include, fines and infringements, cemetery plots and memorials, water and sewerage service connections, royalty payments for landfill gas, sale of scrap metals and event revenue.

The majority of income projections related to other revenues contained within the LTFP are based on historical trend, escalated with CPI.

Other Income

Other income includes commercial and residential rent and community facility hire income .

The majority of income projections related to other income contained within the LTFP are based on historical trend, escalated with CPI.

Financial Expenditure

Operating Expenditure

Council's budgeted operating is \$596.7 million for 2022-23.

Employee Benefits and On-Costs

Employee benefits and on-costs includes salary and wages paid to staff and other direct staff costs such as superannuation, payroll tax, fringe benefits tax and workers compensation. Employee costs are indexed by Council award increases and other legislative changes such as increases to compulsory superannuation guarantee levy payments.

The cost of employees working on capital projects is allocated to specific projects as work is undertaken and budgets for employee costs are split between operating and capital expenditure based on the projects to be undertaken each year.

Borrowing Costs

Traditionally Council has used long term loans to finance large capital expenditures, particularly related to major water and sewerage network projects. The practice of borrowing funds to generate cash flow to deliver large infrastructure allows the cost of the project to be spread across the useful life of the asset in order to facilitate intergenerational equity for these assets. Balloon loan repayments that fall due during the year are most often refinanced as cash flow requirements dictate and to assist intergenerational equity outcomes.

External loan balances are forecast to be \$308 million at 30 June 2022. Interest expense has been projected based on the rates applicable for each loan.

Materials and Services

The Materials and Contracts budget includes materials, consumables, contractor and consultancy costs and contracts including Council's waste collection contract, equipment hire and fuel, information management hardware and chemicals (for water and sewage treatment). Other costs such as insurances, electricity, street lighting and gas, software expenses, Mayoral / Councillor fees, Holiday Park management costs, telecommunication costs, bank charges and Local Government election costs are also included in this category.

Some costs within this category are escalated by CPI (for example waste contract costs) others are reduced in line with efficiency targets and reductions achieved from positive procurement outcomes.

Depreciation and Amortisation

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life. Even though this expense item has no cash consequence, we must invest in equivalent renewal or upgrade works to ensure that the assets are held to their optimal levels of serviceability.

Depreciation expense assumptions are based on the effective lives of existing assets and the expected useful lives of new assets. This information is reviewed annually.

Other Expenses

The other expenses budget reflects costs not included in other operating statement expenditure groupings and includes: Council's contributions to emergency services, the Environment Protection Authority waste levy, Council's annual contribution to the Art House, community grant programs and bad and doubtful debt expenses. No escalation has been applied to this category as efficiency gains are forecast to be achieved in future years.

Capital Expenditure Summary

The 2021-2022 Operational Plan included a four-year capital works program. The capital works program in this draft Operational Plan reflects years two to four of the program and will be refined and amended prior to final adoption.

Council has budgeted to invest \$191.1 million on assets in 2022-23 to improve and add to Council's asset portfolio, which has a gross replacement cost of over \$10.2 billion.

Capital Works by Type of Works and Expenditure Type

The 2022-23 capital works program is targeted at renewal and upgrade works to existing assets, with 84.5% or \$161.5 million focussed on renewals and upgrades of existing assets. This allocation allows Council to maintain and renew existing assets and to address the asset backlog.

Council has also budgeted \$29.6 million, or 15.5% of the capital works program, for new and regionally significant assets.

Statement of Revenue

Overview

The Statement of Revenue details how rates and annual charges are set, as well as fees and charges for use of Council facilities and services.

Council continues to face a serious financial situation and has implemented a number of measures to manage costs and increase income to achieve long-term financial sustainability including obtaining \$150 million in emergency bank loans, major reduction in operating expenses, reducing staff back to pre-amalgamation numbers from over 2,500 to under 2,000, selling \$40-\$60 million in underperforming assets, reviewing fees and charges and finding new revenue sources. Council also applied for a Special Rate Variation (SRV) for the 2021-22 year. The financial details now contained in this section reflect a 1% standard rate peg that will be applied in 2022-23.

Council has a limited number of inflexible rating structures mandated under NSW legislation. All the available structures are primarily based on the unimproved land value of property meaning greater increases in rates where land values have increased.

The total amount of ordinary and special rates Council can charge is capped by legislation, unless additional increase is approved. The Independent Pricing and Regulatory Tribunal (IPART) has approved a 1% rate peg for 2022-23 as the allowable increase on this capped amount.

This capped amount is effectively shared between ratepayers according to the individual value of each property.

Under the Valuation of Land Act 1916 Council is required to use the most current land values when calculating ordinary and special rates.

These values are provided by the NSW Valuer General (VG), the independent statutory authority responsible for determining land values in NSW. The latest values provided by the VG are being used for levying rates in and have a base date of 1 July 2019. These valuations will be used for rating purposes for the 2020-21, 2021-22 and 2022-23 rating years.

Ordinary Rates

Categories

In accordance with s. 514 of the Local Government Act 1993, all parcels of rateable land in Council's area have been classified into one of the following categories of Ordinary rates:

Land Categories		
Farmland	s. 515 of the <i>Local Government Act 1993</i>	Land is categorised as farmland if it is a parcel of rateable land valued as one assessment and its dominant use is for farming or agricultural production. Rural residential land is not categorised farmland.
Residential	s. 516 of the <i>Local Government Act 1993</i>	Land is categorised as residential if it is a parcel of rateable land valued as one assessment and its dominant use is for residential accommodation or rural residential land or if it is vacant land it is zoned or otherwise designated for use under an environmental planning instrument for residential purposes.
Mining	s. 517 of the <i>Local Government Act 1993</i>	Land is to be categorised mining if it is a parcel of rateable land valued as one assessment and its dominant use is for a coal mine or metalliferous mine.
Business	s. 518 of the <i>Local Government Act 1993</i>	Land is to be categorised as business if it cannot be categorised as farmland, residential or mining. Caravan parks and manufactured home communities are to be categorised business.
Business – Major Retail	s. 529(2)(d) of the <i>Local Government Act 1993</i> - a sub-category may be determined for the category “business” according to a centre of activity	The Business Subcategory of Major Retail applies to properties within the major retail precincts in the area of: <ul style="list-style-type: none"> • Bay Village Bateau Bay (refer to Map 1) • Lake Haven Shopping Centre and Home Mega Centre (refer to Map 2) • Westfield Tuggerah (refer to Map 3) • Tuggerah SuperCentre (refer to Map 4) • Erina Fair (refer to Map 5)
Business – Local Retail	s. 529(2)(d) of the <i>Local Government Act 1993</i> - a sub-category may be determined for the category “business” according to a centre of activity	The Business Subcategory of Local Retail applies to properties within the local retail precincts in the area at: <ul style="list-style-type: none"> • Chittaway Bay (refer to Map 6) • Lake Munmorah (refer to Map 7) • San Remo (refer to Map 8) • Wadalba (refer to Map 9) • Kincumber (refer to Map 10) • Lisarow (refer to Map 11) • West Gosford (refer to Map 12) • Woy Woy (refer to Map 13) • Wyoming (refer to Map 14) • Gosford (refer to map 15)

The categorisation of all rateable land was determined as at 1 January 1994 and took place with the issue of the rate notice in January 1994.

New parcels of land created since that date have been categorised with the issue of subsequent rate notices. Where subsequent changes in categorisation have occurred, written notices to this effect have been issued in accordance with s. 520 of the Local Government Act 1993.

Rating Structure

Council has a limited number of inflexible rating structures mandated by NSW State legislation for the practical application of ordinary rates. These rating structures are determined by Section 497 of the Local Government Act 1993 as:

- An ad valorem¹ charge per dollar value of land (ad valorem rating structure)
- A base amount plus an ad valorem (base amount rating structure)
- An ad valorem with a minimum rate (minimum rate rating structure)

The following table provides a summary of the 2022-23 rates structure.

Ordinary Rates

Ordinary rates are used to provide essential services such as the road network, street lighting, street cleaning, footpaths, parks, sport and recreation facilities, environmental planning and conservation, city rangers, pest control, libraries, town planning and building control, community services, and much more.

Category and Sub- category	No. of Properties	Minimum (\$)	Ad Valorem Cents per \$ land value	Forecast Income per category \$
Farmland	429	571	0.186600	908,000

Annual Charges for Services

In addition to ordinary rates and special rates, Council will levy annual charges for the following services in 2022-23:

- Domestic waste management services
- Waste management services (non-domestic)
- Water supply services
- Sewerage services
- Stormwater drainage services

The annual charges for water supply, sewerage, stormwater drainage and ancillary services are presented in accordance with Council's September 2021 IPART pricing submission, using forecast CPI movement of 2.5%. IPART's final pricing determination is expected to be released in May 2022 and the charges presented for water, sewerage, drainage and ancillary services for 2022-23 will be updated as per the final determination.

Domestic Waste Management Service Charges

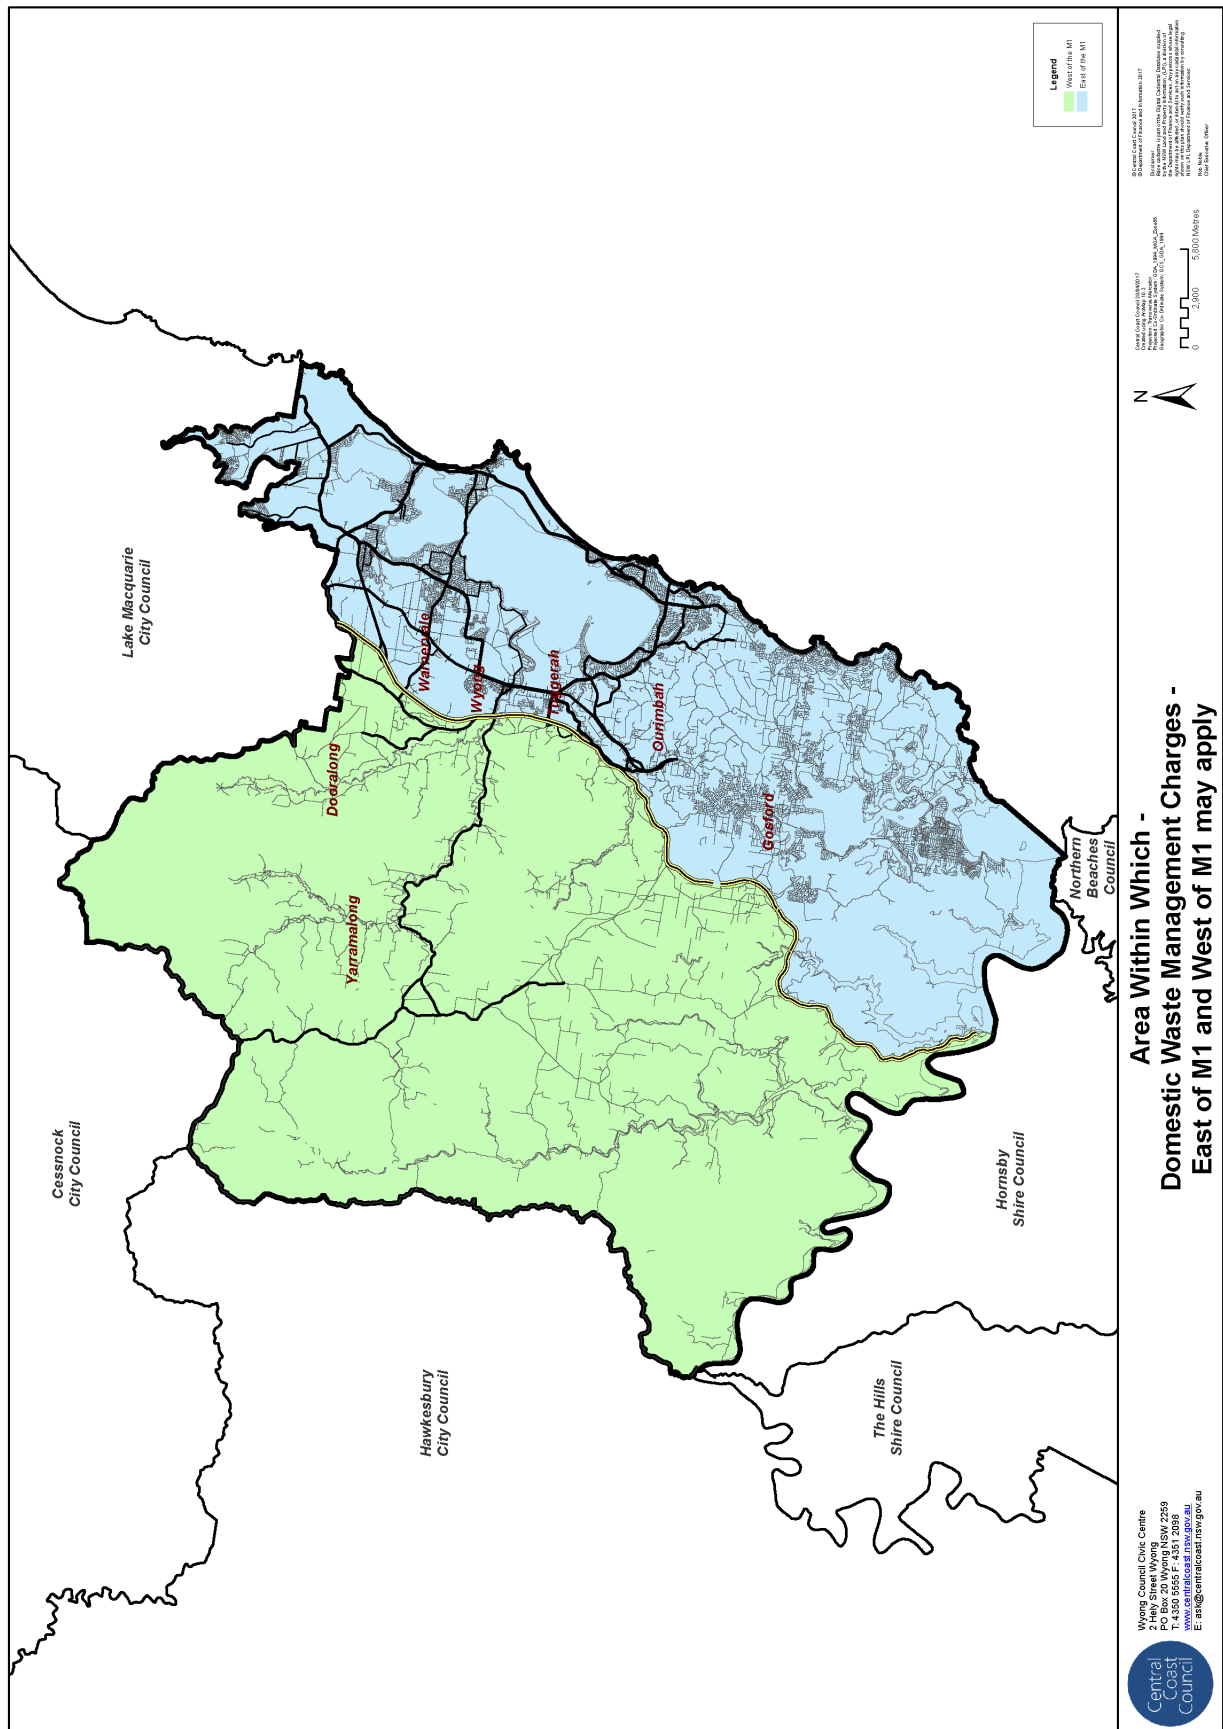

Council levies a domestic waste management service charge on all parcels of rateable land to which a service is available. This covers the cost of providing waste collection and recycling services and the whole of life cost for managing waste including the remediation of landfills.

Domestic Waste Management Service Charges	Annual Charge	Rate Per Week	No of Assessments	Forecast Income
<p>Domestic Waste Management Availability Charge</p> <p>Purpose: Fund waste management facilities to meet potential future demands from vacant land.</p> <p>Applies to: All vacant parcels of rateable land within Council's waste collection area.</p> <p>Refer Map 22</p>	\$74.00	\$1.42	2,341	\$173,234
<p>Domestic Waste Management Service – Eastern Area</p> <p>Purpose: Cover cost of Council's three bin waste and recycling collection services plus the whole of life cost for managing waste including the remediation of landfills.</p> <p>Applies to: all domestic properties within Council's waste collection area located east of the M1 Motorway with an approval for a</p>	\$529.00	\$10.17	137,282	\$72,622,178

Domestic Waste Management Service Charges	Annual Charge	Rate Per Week	No of Assessments	Forecast Income
<p>residential building. Multiple charges will apply where multiple dwellings have been approved.</p> <p>Provides: Access to Council's three bin collection service consisting of:</p> <ul style="list-style-type: none"> • Weekly collection of a 140 litre waste bin • Fortnightly collection of a 240 litre recycling bin • Fortnightly collection of a 240 litre garden vegetation bin • Six kerbside clean up services per year. <p>Upgrades and additional services: Available upon request of the owner at the additional cost(s) indicated below under <i>Domestic waste management service – upgrades and additional services</i>.</p> <p>Options for large residential complexes: Where more than 6 strata titled or community title residential units exist on one allotment, bulk bin options for waste and or recyclables may be provided up to the equivalent volume of one 140 litre waste bin per tenement.</p> <p>Refer Map 22</p>				

Domestic Waste Management Service Charges	Annual Charge	Rate Per Week	No of Assessments	Forecast Income
<p>Domestic Waste Management Service – Western Area</p> <p>Purpose: Cover cost of Council’s two bin waste and recycling collection services plus the whole of life cost for managing waste including the remediation of landfills.</p> <p>Applies to: all domestic properties within Council’s waste collection area located west of the M1 Motorway with an approval for a residential building. Multiple charges will apply where multiple dwellings have been approved</p> <p>Provides: Access to Council’s two bin collection service consisting of</p> <ul style="list-style-type: none"> • Weekly collection of a 140 litre waste bin • Fortnightly collection of a 240 litre recycling bin • Six kerbside clean up services per year. <p>Upgrades and additional services: Available upon request of the owner at the additional cost(s) indicated below under <i>Domestic waste management service – upgrades and additional services</i>.</p> <p>Refer to Map 22</p>	\$469.00	\$9.02	3,630	\$1,702,470

Map 22 – Domestic Waste Management Charges Eastern Area and Western Area

Domestic Waste Upgrades and Additional Services

Domestic properties may upgrade their 140 litre domestic waste bin to a 240 litre or 360 litre domestic waste bin and/or upgrade their 240 litre recycling bin to a 360 litre recycling bin and/or request additional 140, 240 or 360 domestic waste bins, 240 or 360 litre recycling bins or 240 litre garden vegetation bins.

The costs to upgrade and for additional bins are shown in the table below:

Service Upgrades and Additions	Annual Charge	Rate Per Week
140 litre domestic waste bin to 240 litre domestic waste bin upgrade	\$141.00	\$2.71
140 litre domestic waste bin to 360 litre domestic waste bin upgrade	\$281.00	\$5.40
140 litre domestic waste bin additional service	\$279.00	\$5.37
240 litre domestic waste bin additional service	\$422.00	\$8.12
360 litre domestic waste bin additional service	\$562.00	\$10.81
240 litre recycling bin to 360 litre recycling bin upgrade	\$37.00	\$0.71
240 litre recycling bin additional service	\$106.00	\$2.04
360 litre recycling bin additional service	\$141.00	\$2.71
240 litre vegetation bin additional service	\$114.00	\$2.19

The anticipated yield for 2022-23 from the upgraded domestic waste services is \$4,262,210.

Additional Short Term Extra Service

Residents may receive an additional service to any bin type on any working day by providing one full business day notice.

Additional Service	Rate Per Additional Service
140 litre Domestic Waste Bin	\$19.50
240 litre Domestic Waste Bin	\$20.50
360 litre Domestic Waste Bin	\$22.00
660 litre Domestic Waste Bin	\$40.00
1.1 m ³ Domestic Waste Bin	\$66.50
1.5 m ³ Domestic Waste Bin	\$91.00
240 litre Recycling Bin	\$20.50
360 litre Recycling Bin	\$22.00
660 litre Recycling Bin	\$40.00
1.1 m ³ Recycling Bin	\$66.50
1.5 m ³ Recycling Bin	\$91.00
240 litre Vegetation Bin	\$20.50

Additional Kerbside Collection Service

Residents may receive an additional Kerbside collection service on any working day by providing two full business days notice.

Additional Service	Rate Per Additional Service
Extra kerbside collection (Per 1m3)	\$85.50

Other Waste Management Service Charge – Non Domestic

Council levies the waste management charge on all parcels of applicable land for which a Council waste, recycling or vegetation bin service is provided.

Commercial customers and non-rateable properties may be provided with waste bins of various capacities and/or with recycling bins of various capacities and/or a 240 litre garden vegetation bin.

The standard service frequency for the waste bins is once per week and the recycling bins and 240 litre garden vegetation bin is once per fortnight.

Multiple services per week of any bin can be arranged in accordance with the waste collection contract. The cost will be the multiple of the standard annual charge.

Service	Annual Charge	Rate Per Week
140 litre Waste Bin	\$397.00	\$7.63
240 litre Waste Bin	\$529.00	\$10.17
360 litre Waste Bin	\$659.00	\$12.67
660 litre Waste Bin	\$2,260.00	\$43.46
1.1 m ³ Waste Bin	\$3,156.00	\$60.69
1.5 m ³ Waste Bin	\$4,250.00	\$81.73
240 litre Recycling Bin	\$106.00	\$2.04
360 litre Recycling Bin	\$142.00	\$2.73
660 litre Recycling Bin	\$293.00	\$5.63
1.1 m ³ Recycling Bin	\$486.00	\$9.35
1.5 m ³ Recycling Bin	\$664.00	\$12.77
240 litre Vegetation Bin	\$114.00	\$2.19

The yield to Council from these charges in 2022-23 is estimated to be \$4,255,846.

Pension Rebates - Ordinary Rates and Domestic Waste Management Charges

Council provides a rate reduction on the combined ordinary rate levy amount and the domestic waste management charge of 50%, with a maximum combined reduction of \$250 to eligible pensioners.

Of this reduction 55% is reimbursed to Council by the NSW Government.

The estimated total amount of pension rebates for ordinary rates and domestic waste management charges in 2022-23 is \$6,373,000 of which 55% is funded by the NSW Government with the balance funded by Council.

Water, Sewerage and Stormwater Drainage Charges

Central Coast Council's water, sewerage and stormwater drainage services and a number of its associated ancillary services are levied under the Water Management Act 2000. Those services are declared monopoly services under s. 4 of the Independent Pricing and Regulatory Tribunal Act 1992.

Council's prices must therefore be set in accordance with any IPART determined methodologies and/or maximum prices and are subject to approval by the relevant Minister.

The latest IPART determinations issued on 24 May 2019 applied for three years from 1 July 2019 to 30 June 2022 (the 2019 determination period).

Council made a submission to IPART in September 2021 in relation to setting prices for the four years from 1 July 2022 to 30 June 2026 (the 2022 determination period). All prices for water, sewerage, drainage and ancillary services for 2022-23 are presented in accordance with Council's IPART pricing submission, using forecast CPI movement of 2.5%. IPART's final pricing determination is expected to be released in May 2022 and the charges presented for water, sewerage, drainage and ancillary services for 2022-23 will be updated as per the final determination.

Water Supply Service Charges

Council levies the water supply service charge on the owners of all properties for which there is a connected water supply service. This covers the costs of making water available. Council does not levy water supply service charges to unconnected properties.

For those properties that become chargeable or non-chargeable during the year the charge will be applied in their next billing period (e.g. next quarter).

The proposed water supply service charges for 2022-23 are as follows:

Basis of Charge	Annual Charge
Meter Size or Property Type	
Unconnected Property	NIL
Unmetered Property (Connected to the water supply system but not serviced by a meter)	\$238.33
20mm meter	\$238.33
25mm meter	\$372.39
32mm meter	\$610.13

Basis of Charge	Annual Charge
Meter Size or Property Type	
40mm meter	\$953.33
50mm meter	\$1,489.58
80mm meter	\$3,813.32
100mm meter	\$5,958.32
150mm meter	\$13,406.23
200mm meter	\$23,833.30
250mm meter	\$37,239.53
300mm meter	\$53,624.92
350mm meter	\$72,989.48
400mm meter	\$95,333.20

The expected total yield in 2022-23 from water service charges is \$35,172,000.

Water Usage Charges

In addition to the water supply service charge, it is proposed all potable water consumed will be charged at \$2.25 per kilolitre.

Where water usage relates to multiple financial year periods the usage will be apportioned to each period on a daily average basis and the applicable period's water usage charge will be applied.

Where a property is unmetered the water usage for that property will be a deemed volume based on the previous metered period (approx. 365 days). If there is not a previous metered period zero kilolitres will be charged.

Where a property is unconnected zero kilolitres will be charged.

The expected total yield in 2022-23 from water usage charges is \$60,226,000.

Sewerage Supply Service Charges

Council levies this charge to cover the cost of supplying sewerage services on all properties for which there is a sewerage service either connected or available. Council does not levy sewerage supply service charges to unconnected properties. For those properties that become chargeable or non-chargeable during the year the charge will be applied in the next billing period.

Non Residential properties will be levied a sewerage service charge based on meter size and sewerage usage charges. However, Non-Residential properties within a Mixed Multi-Premises that is serviced by a common meter will be levied a sewerage service charge based on a 20mm meter. A discharge factor in accordance with Council's Trade Waste Policy is applied to the charges

Residential properties will be levied a sewerage service charge based on a 20mm meter with a fixed sewerage discharge factor of 75% and a deemed sewerage usage charge based on the property type.

The proposed sewerage service charges for 2022-23 are as follows:

Basis of Charge	Annual Charge
Meter Size or Property Type	
Unconnected Property	NIL
Unmetered Property	\$664.94
20mm meter	\$664.94
25mm meter	\$1,038.98
32mm meter	\$1,702.26
40mm meter	\$2,659.79
50mm meter	\$4,155.92
80mm meter	\$10,639.17
100mm meter	\$16,623.70
Other Meter sizes	$(\text{Meter size in mm})^2 \times \text{sewerage access charge for a 20mm Meter for the applicable period}$ 400

The above prices do not include the discharge factor – the maximum to be paid. Exempt properties pay for sewer usage only based on water consumption and discharge factor (usage charge). Service charge applies equally to those living in houses, apartments, multi premises, mixed multi premise and unconnected properties. Exempt properties pay for water and sewer usage only. Applying the fixed sewerage discharge factor of 75% for Residential Properties, the sewerage service charge for a Residential Property is proposed to be \$498.71.

The expected total yield in 2022-23 from sewerage supply service charge is \$72,648,000.

Sewerage Usage Charges

For the purpose of the sewerage usage charge, the volume deemed to have been discharged from a Property into the sewerage system is

- (1) in the case of a Residential Property:
 - (A) within a Mixed Multi or Multi-Premises: 80/365 kilolitres per day of that period;
 - (B) not within a Mixed Multi or Multi-Premises: 125/365 kilolitres per day of that period;
- (2) in the case of a Non-Residential Property:
 - (A) within a Mixed Multi-Premises: 125/365 kilolitres per day of that period;
 - (B) not within a Mixed Multi-Premises: – the volume of water supplied to that Property multiplied by the Sewerage Discharge Factor; and
- (3) In the case of an Unconnected Property – zero kilolitres.

Exempt Land will be charged for sewerage usage charges.

It is proposed sewage discharged into the sewerage network will be charged at \$0.93 per kilolitre.

The expected total yield in 2022-23 from sewer usage charges is \$17,529,000.

Recycled Water

Supply of reticulated tertiary treated sewerage effluent, except when covered by an individual agreement, will be charged at 50% of the potable water supply charge. This proposed charge is \$1.13 per kilolitre for the 2022-23 financial year.

Bulk Water Transfers

Bulk water transfers between Hunter Water and Central Coast Council will be charged at \$0.33 per kilolitre for the 2022-23 financial year.

Stormwater Drainage Service Charges

This charge is levied by Council for the provision of stormwater drainage services and covers the cost of maintaining the drainage network.

The stormwater drainage charge can only be levied within a declared Drainage Area under the Water Management Act 2000. Currently there are two declared Drainage Areas – the former Gosford Drainage Area covers the entire former Gosford LGA (refer to Map 23), while the Drainage Area for the former Wyong LGA includes all properties within 1.5km and/or east of the M1 (refer to Map 24).

For information on assessing properties as low impact for stormwater drainage service charges and the appropriate application form please refer to Council's website www.centralcoast.nsw.gov.au.

Stormwater Drainage Residential

Basis of Charge	Annual Charge
Residential Property that is not part of a Multi-Premises	\$181.70
Each Property within a Residential Multi-Premises or Mixed Multi-Premises	\$136.27
Farmland	\$181.70
Vacant Land	\$133.96

Stormwater Drainage Area Non-Residential

The area-based stormwater drainage service charge is applicable to Non-Residential Properties that do not fall within one of the categories of Property that may be charged a fixed stormwater drainage service charge.

Property Area	Annual Charge
Each Property within a Residential Multi-Premises or Mixed Multi-Premises	\$136.27
Low Impact	\$181.70
Area Based	
Small ($\leq 1,000\text{m}^2$)	\$181.70
Medium ($> 1,000\text{m}^2$ and $\leq 10,000\text{m}^2$)	\$317.97
Large ($> 10,000\text{m}^2$ and $\leq 45,000\text{m}^2$)	\$1,499.03
Very Large ($> 45,000\text{m}^2$)	\$4,542.54
Vacant Land	
All customers	\$136.27

The expected total yield in 2022-23 from the stormwater drainage charge is \$25,281,000.

Pension Rebates - Water and Sewerage Service Charges

Council provides a reduction of 50% of the water supply service and water usage charges levied up to a maximum of \$87.50 and a further reduction of 50% of sewerage service and sewerage usage charges levied up to a maximum of \$87.50.

Of these reductions 55% is reimbursed by the NSW Government. The estimated total amount of the pension rebate in 2022-23 is \$4,264,000.

Goods and Services Tax

Goods and Service Tax (GST) does not apply to Council's annual rates and charges. GST does however apply to certain fees as indicated in the schedule of fees and charges pursuant to a new *A New Tax System (Goods and Services Tax) Act 1999*.

Water, Sewerage and Stormwater Drainage Maps

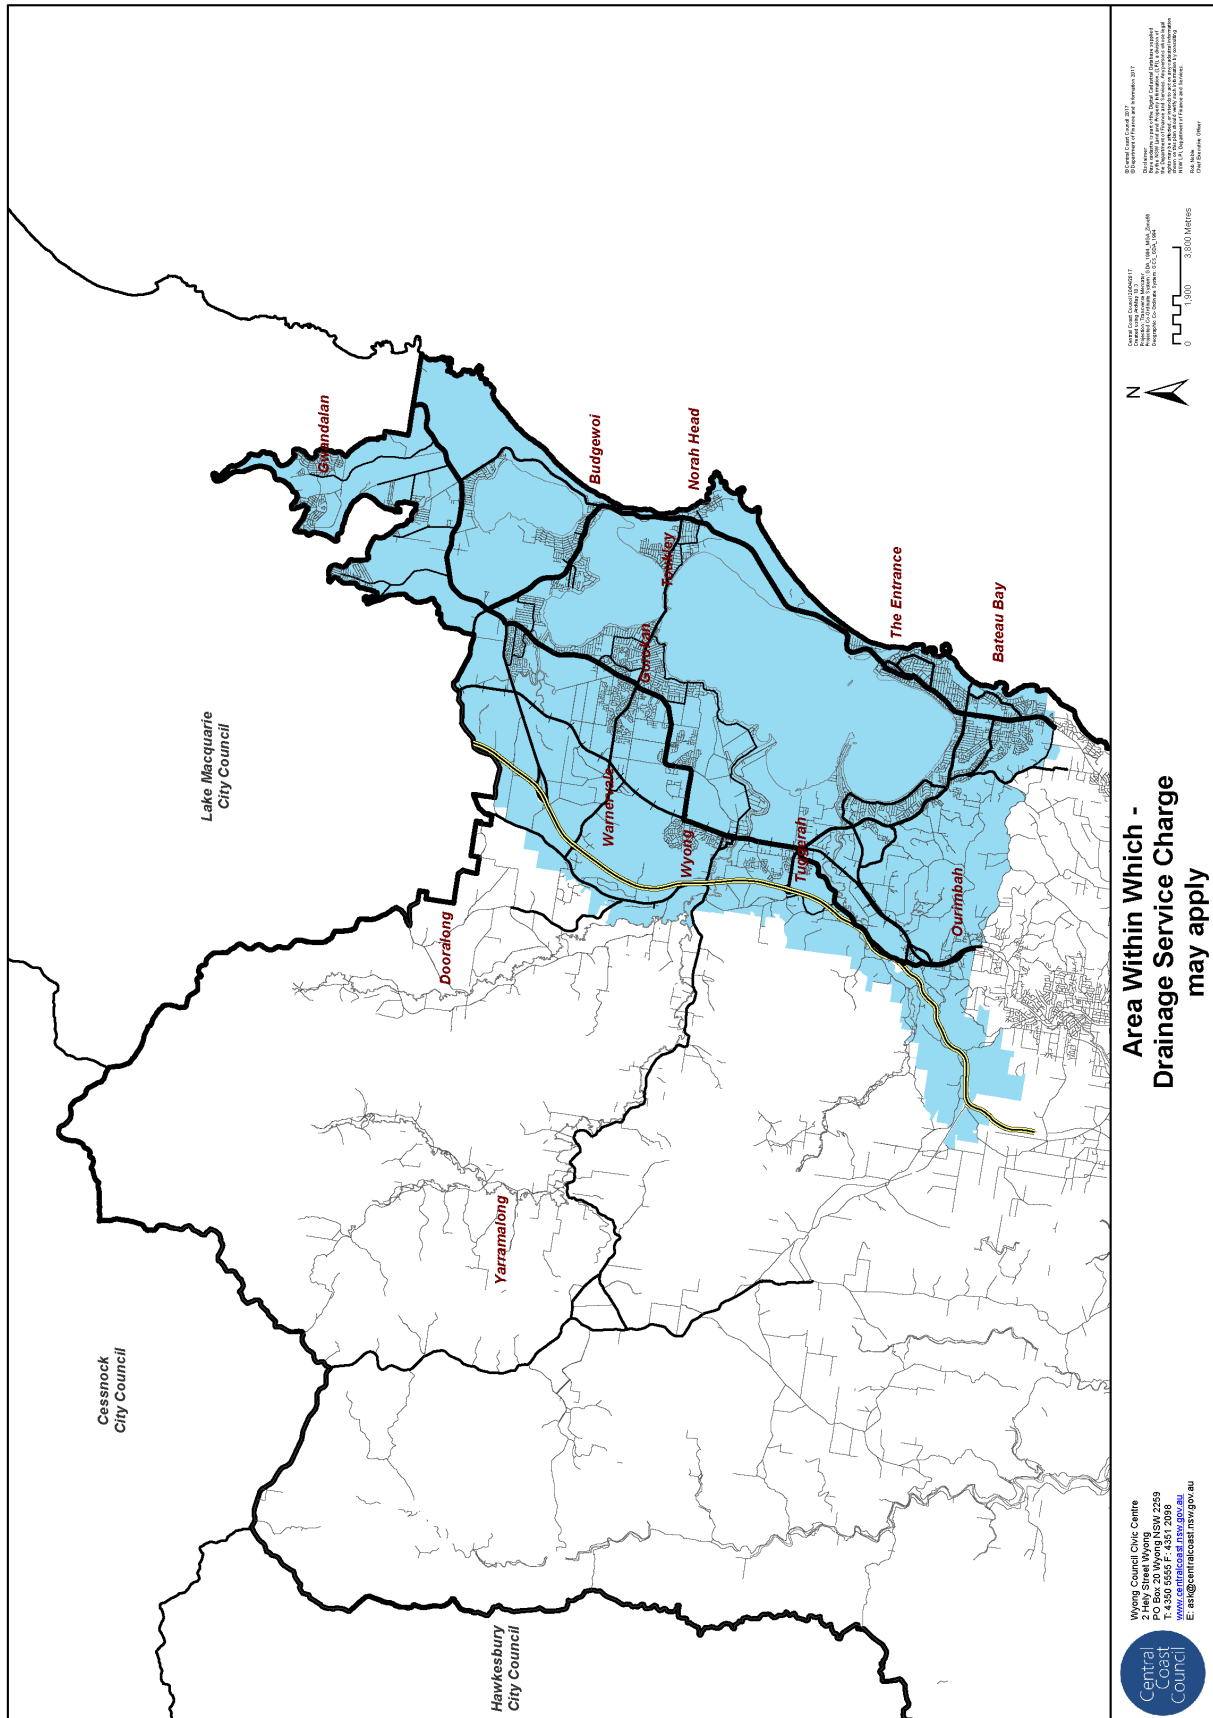

The following maps are included under Stormwater Drainage:

- Former Gosford Local Government Area
- Former Wyong Local Government Area
- Proposed Stormwater Area

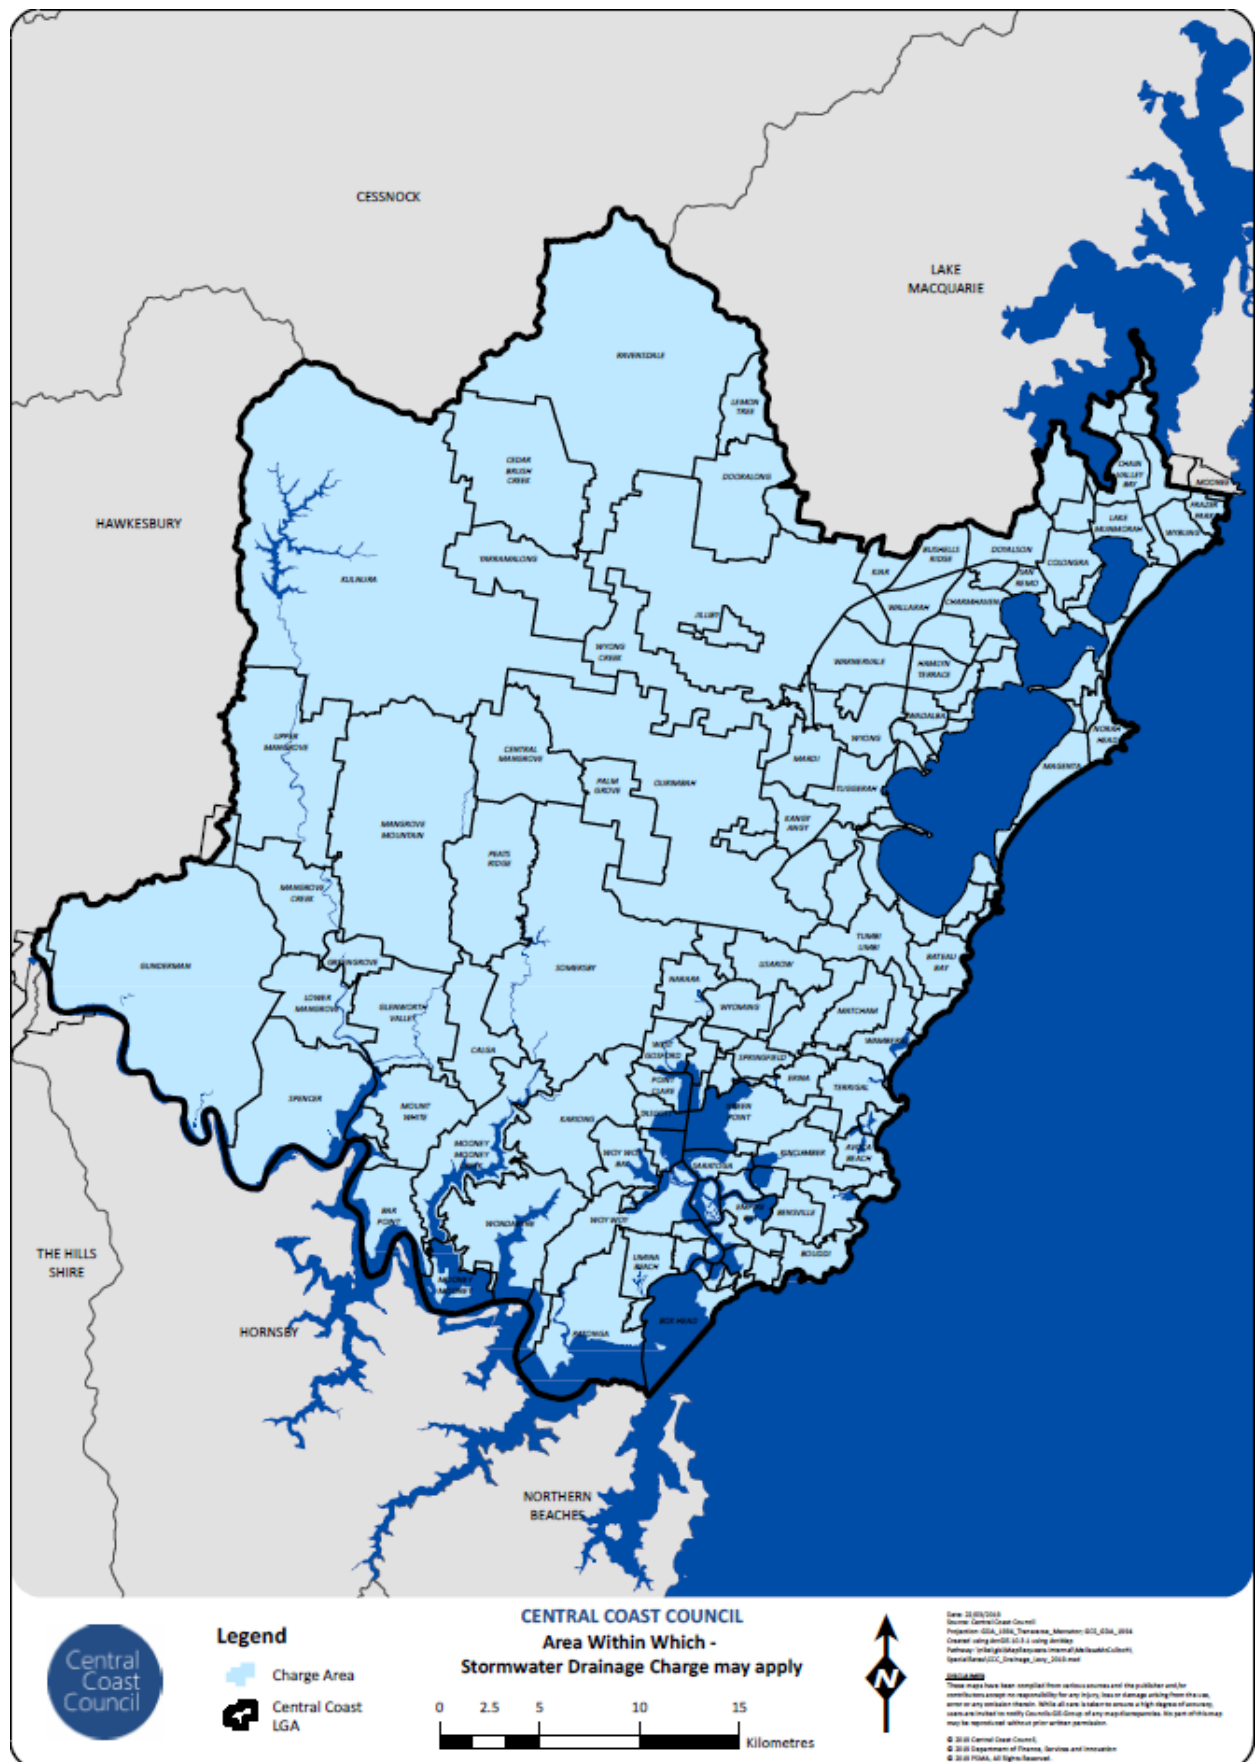

Map 23 – Stormwater Drainage Service Charge Area (former Gosford Local Government Area)

Map 24 – Stormwater Drainage Service Charge Area (former Wyong Local Government Area)

Map 25 – Proposed Stormwater Drainage Service Charge Area

Water, Sewerage and Stormwater Drainage Service Usage Charges

The pricing for water, sewerage and stormwater drainage service and usage charges for each property type is as follows:

Property Type	Water Service Charges	Water Usage Charges	Sewer Service Charges	Sewer Usage Charges	Stormwater Drainage Service Charges
Metered residential properties with individual meter(s)	Each property is levied the 20mm meter water service charge.	Each property will be levied for water passing through its meter.	Each property is levied the 20mm meter sewerage service charge multiplied by the deemed fixed sewerage discharge factor of 75%.	Each property will be levied a deemed usage charge.	Each property is levied the stormwater drainage service charge based on their property category.
Metered residential properties with a common meter(s)	Each property will be levied the 20mm meter water service charge.	Usage through a common meter will be apportioned by unit entitlement or apportioned equally across all premises.	Each property is levied the sewerage service charge for a 20mm meter multiplied by the deemed fixed sewerage discharge factor of 75%.	Each property will be levied a deemed usage charge	Each property will be levied the stormwater drainage service charge based on their property category.
Metered Residential properties within a mixed multi-premises that is serviced by a common meter	Each property is levied the 20mm meter water service charge	Usage through a common meter will be apportioned by unit entitlement or apportioned equally across all premises.	Each property is levied the sewerage service charge for a 20mm meter, multiplied by the deemed fixed sewerage discharge factor of 75%.	Each property will be levied a deemed usage charge – note no discharge factor is applied.	Each property is levied the stormwater drainage service charge based on their property category.
Metered Non-residential properties with individual meter(s).	Each property is levied the water service charge based on the meter size(s) of the property.	Each property will be levied for water passing through its meter.	Each property is levied the sewerage service charge based on the meter size of the property, multiplied by the applicable discharge factor.	Sewer usage is based on the water usage multiplied by the applicable discharge factor.	The storm water drainage service charge will apply based on either low impact or on the rateable properties land size.

Property Type	Water Service Charges	Water Usage Charges	Sewer Service Charges	Sewer Usage Charges	Stormwater Drainage Service Charges
Metered non-residential properties with a common meter(s)	Each property is levied the water service charge based on the size of the meter(s), divided by the number of properties within the premises that is served by the meter(s).	Usage through a common meter will be apportioned by unit entitlement or apportioned equally across all premises.	Each property is levied the sewerage service charge based on the size of the meter(s), divided by the number of properties within the premises that is served by the meter(s) multiplied by the applicable discharge factor.	Usage through a common meter will be apportioned by unit entitlement or apportioned equally across all premises.	Each property is levied the stormwater drainage service charge based on either low impact or rateable properties land size.
Metered Non-Residential properties within a mixed multi-premises that is serviced by a common meter	Each property is levied the 20mm meter water service charge	Usage through a common meter will be apportioned by unit entitlement or apportioned equally across all premises.	Each property is levied the sewerage service charge for a 20mm meter, multiplied by the applicable sewerage discharge factor.	Each property will be levied a deemed usage charge.	Each property is levied the stormwater drainage service charge based on the property category.
Water fire service.	There is no charge for a separate fire service. Where a property has a combined fire and commercial service the property will be charged in accordance with meter size.	Usage is not charged for a dedicated fire service Where there is a combined service the property will be levied for water greater than 10 kilolitres passing through its meter.	No charge.	No charge.	No charge.
Unmetered Residential properties connected to the water and sewerage supply system but not serviced by a meter.	Each property is levied the water service charge for unmetered properties.	Water usage will be a deemed volume based on the previous metered period (approx. 365 days). If there is not a previous metered period zero	Each property is levied the sewerage service charge for unmetered properties.	Each property will be levied a deemed usage charge.	Each property is levied the stormwater drainage service charge based on the property category

Property Type	Water Service Charges	Water Usage Charges	Sewer Service Charges	Sewer Usage Charges	Stormwater Drainage Service Charges
		kilolitres will be charged.			
Unmetered Non-Residential properties connected to the water and sewerage supply system but not serviced by a meter.	Each property is levied the water service charge for unmetered properties.	Water usage will be a deemed volume based on the previous metered period (approx. 365 days). If there is not a previous metered period zero kilolitres will be charged.	Each property is levied the sewerage service charge for unmetered properties.	Sewer usage will be a deemed volume based on the water usage from the previous metered period (approx. 365 days). If there is not a previous metered period zero kilolitres will be charged.	Each property is levied the stormwater drainage service charge based on the property category
Metered Non-Rateable Residential property	No Charge	Each property will be levied for water passing through its meter.	No Charge	Each property will be levied a deemed usage charge.	No Charge
Metered Non-Rateable Non-Residential property	No Charge	Each property will be levied for water passing through its meter.	No Charge	Sewer usage is based on the water usage multiplied by the applicable discharge factor.	No Charge

Liquid Trade Waste Charges

Liquid trade waste is defined as all liquid waste other than sewage of a domestic nature. Liquid trade waste can be produced by business, commercial, and industrial activities, by community/public facilities, and by institutions such as hospitals, schools and correctional facilities.

Council provides liquid trade waste services on a commercial basis, with full cost recovery through fees and charges. Four categories of liquid trade waste have been established for liquid trade waste charging purposes (Category 1, Category 2, Category 3 and Category S). These charging categories and the charging components are as follows:

Application Fee	Annual Trade Waste Fee	Reinspection Fee	Liquid Trade Waste Usage charge per kiloliter (kL)	Excess Mass charges per kilogram (kg)	Non-compliant Excess Mass charges per kilogram (kg)
Category 1					
Category 1 liquid trade waste dischargers are those conducting an activity deemed by Council as requiring nil or minimal pre-treatment equipment and whose effluent is well defined and generally (but not completely) of low risk to the sewerage system. In addition, Category 1 includes dischargers requiring prescribed pre-treatment but with low impact on the sewerage system.					
\$137.01	\$143.95	\$158.69	No charge	No charge	No charge
Category 2					
Category 2 liquid trade waste dischargers are those conducting an activity deemed by Council as requiring a prescribed type of liquid trade waste pre-treatment equipment and whose effluent is well characterised.					
\$173.43	\$444.18	\$158.69	Compliant \$1.94 per kL Non-compliant \$16.61 per kL	No charge	No charge
Category 3					
Category 3 liquid trade waste dischargers are those conducting an activity which is of an industrial nature and/or which results in the discharge of large volumes (over 20 kL/d) of liquid trade waste to the sewerage system. Any Category 1 or Category 2 discharger whose volume exceeds 20 kL/d may be categorised as a Category 3 discharger.					
\$2,733.76	\$1,682.31	\$158.69	No charge	Refer attached Schedule of Fees	Refer attached Schedule of Fees
Category S					
Category S dischargers are those conducting an activity of transporting and/or discharging septic tank, chemical toilet waste, ship-to-shore pump out or pan content waste into the sewerage system. Council does not deal directly with residential customers under Category S.					
Non-residential \$173.43 Includes one inspection	Non-residential \$210.29	\$158.69	Category S \$18.61 per kL Category S (Septic effluent unable to discharge onsite) \$1.94 per kL	No charge	Charged to private pumping stations only – in accordance with attached Schedule of Fees

The charges nominated by IPART determination are applied in accordance with the New South Wales Liquid Trade Waste Regulation Guidelines and Central Coast Council Liquid Trade Waste Policy. The trade waste charges apply in addition to sewer services charges.

The application fee recovers the cost of administration and technical services provided by Council in processing applications for approval to discharge liquid trade waste to the sewerage system. The purpose of the annual trade waste fee is to recover the cost incurred by Council for administration and the scheduled inspections each year to ensure a liquid trade waste discharger's ongoing compliance with the conditions of their approval. Where non-compliance with the conditions of an approval has

been detected and the discharger is required to address these issues, Council will undertake re-inspections for a fee to confirm that remedial action has been satisfactorily implemented.

Volume-based trade waste usage charge is imposed to recover the cost of transporting and treating liquid trade waste in Council's sewage treatment plant and disposing the solid and liquid components appropriately. Excess mass charges will apply per kilogram of substances discharged in excess of the deemed concentration (listed in the Liquid Trade Waste Policy) in domestic sewage. Where a discharge quality fails to comply with the approved concentration limits of substances specified in Council's approval conditions or the acceptance criterion listed in the Liquid Trade Waste Policy, non-compliant excess mass charges may also apply in accordance with the formulas contained in Central Coast Council Liquid Trade Waste Policy.

The estimated total yield in 2022-23 from trade waste charges is \$2,649,000.

Overdue Rates and Charges

Interest on Overdue Rates and Charges

In accordance with s. 566 of the *Local Government Act 1993* and s. 356 of the *Water Management Act 2000* Council charges interest on all rates and charges which remain unpaid after they become due and payable. Interest will be calculated on a daily basis using the simple interest method.

Council will apply the lower of the maximum interest rates applicable to either overdue rates and charges levied under the *Local Government Act 1993* or overdue charges levied under the *Water Management Act 2000*.

The due dates for payment of rates and charges levied under the *Local Government Act 1993* are as follows:

- If payment is made in a single instalment, the instalment is payable by 31 August 2022
- If payment is made by quarterly instalments, the instalments are payable by 31 August 2022, 30 November 2022, 28 February 2023 and 31 May 2023

The due date for payment of water, sewerage and drainage services charges and usage charges, is a minimum of 30 days after issue date.

In accordance with s. 566(3) of the *Local Government Act 1993*, the Minister for Local Government has determined that the maximum rate of interest payable on overdue rates and charges levied under the *Local Government Act 1993* for the 2022-23 rating year will be 6%.

The methodology used to calculate the interest rate is the Supreme Court methodology (the Reserve Bank cash rate plus 6%), rounded to the nearest half per cent. The current Reserve Bank cash rate of 0.10% has been effective since 4 Nov 2020.

In accordance with s. 356 of the *Water Management Act 2000*, the maximum rate of interest payable on overdue rates and charges levied under the *Water Management Act 2000* is the rate payable for the time being on an unpaid judgment of the Supreme Court.

- In respect of the period from 1 January to 30 June in any year – the rate that is 6% above the cash rate last published by the Reserve Bank of Australia before that period commenced
- In respect of the period from 1 July to 31 December in any year – the rate that is 6% above the cash rate last published by the Reserve Bank of Australia before that period commenced.

The current Reserve Bank cash rate of 0.10% has been effective since 4 Nov 2020 means that the maximum rate of interest payable on overdue rates and charges levied under the *Water Management Act 2000*, from 1 January 2022 will be 6.1%.

Hardship Policy

Council recognises the hardship residents or businesses may experience and has a Hardship Policy that offers a number of resources to assist ratepayers during these times. The Hardship Policy was updated in February 2021 and takes into consideration the rate increase. If IPART approves the continuation of the SV, help will continue to be available to those having trouble paying their rates. For more information visit: www.centralcoast.nsw.gov.au/residents/property/pay-rates-and-water-bills/rebates-and-hardship-assistance#hardship.

Developer Contributions

How Developer Contributions are Levied

Development contributions (also known as local infrastructure contributions) are charged by Council when new development occurs. These contributions fund local infrastructure needed to support an increased number of residents in the area. This type of local infrastructure typically includes local roads, stormwater and drainage, shared pathways, parks, playspaces or other recreational areas, environmental land and community facilities.

Contributions may be in the form of cash payments, transfer or dedication of land (such as land for a new park), works in kind or the provision of public amenities or services not included in a contributions plan.

Developer contributions for water and sewerage services are levied under the *Water Management Act 2000* and in accordance with the methodology developed by the Independent Pricing and Regulatory Tribunal (IPART).

The various contributions are contained in Council's Development Servicing Plans which are available for inspection at Council's offices or via Council's website.

Other Developer Contributions are levied in accordance with s. 7.11 of the *Environmental Planning and Assessment Act 1979*. The various contribution rates are listed in the s. 7.11 plans available for inspection at Council's offices or via Council's website - <https://www.centralcoast.nsw.gov.au/plan-and-build/planning-controls-and-guidelines/development-contributions>.

Works on Private Land

Charges for Works on Private Land

In accordance with s. 67(1) of the *Local Government Act 1993* Council may lawfully, by agreement with the owner or occupier of any private land, carry out any kind of work on that land.

The rates to be adopted by Council are set to recover the estimated cost to Council in providing the works on private land. The amounts to be charged for private works are set out in the attached Schedule of Fees in accordance with the type of works conducted by Council as indicated below:

- Septic and sewer connection inspections and applications
- Water service connections and applications
- Footpath reinstatement
- Construction – kerb, guttering and foot paving
- Vehicle crossings
- Concrete work – supervision, design, etc.
- Kerb and gutter – supervision, design, etc.
- Road reinstatement
- Road testing

For all other works a minimum charge for the use of Council labour, plant or materials on private land is charged equal to the actual cost (including overheads) plus 10%.

The Chief Executive Officer has the authority to set the fee for works to be undertaken by Council on private land, using Council labour, plant or materials, having regard to market forces in each instance, on condition that no such charge shall be less than the actual cost to Council (including overheads) plus 10%.

Statement of Borrowings

Proposed Borrowings for 2022-23

It is Council policy to borrow to fund capital projects that have a life expectancy beyond the term for repayment of the loan in order to establish intergenerational equity if there is not sufficient working capital available.

Loans are secured over the income or assets of the Council.

In 2022-23 Council does not expect to require borrowings from external financial institutions for capital projects. Balloon loan repayments that fall due during the year may be refinanced.

Council will continue to evaluate how it can utilise funds on hand, by way of internal loans, subject to restriction constraints as part of its annual review of funding requirements.
