

Delivery Program 2014/15 to 2017/18

The development of Blayney Shire Council Integrated Planning and Reporting documents has been managed as a collaborative project of the WBC Strategic Alliance of Councils with the assistance of Bob Campbell and Lynda Jones of Groupworks

This collaboration has greatly benefited the process and will support these councils working together in the future to ensure the viability and sustainability of their individual councils and communities.

Message from the Mayor and General Manager

On behalf of the members of the communities of Blayney Shire, I am pleased to present the first draft Delivery Program as part of our Integrated Planning and Reporting framework.

In 2011 the Community came together and developed Community Strategic Plan - Blayney Shire 2025: *All the pieces together*. This is the community's plan and will guide the development of Blayney Shire Council until 2025. To make it happen all sectors across our community will need to work together. Obviously a key community player is the Council but Council alone cannot do everything.

There are a number of key plans linked together to achieve the community aspirations outlined in the Community Strategic Plan. They are:

- The Community Strategic Plan
- Council 4 year Delivery Program
- Council 1 year Operational Plan
- Council's Asset, Financial and Workforce Plans

This draft **Delivery Program** deals with the actions and tasks where Council has a role to play and identifies what we plan to do over the next year to help achieve the community's vision for Blayney Shire. The plan shows the varied actions Council undertakes and how we will measure progress. It also identifies the responsibility for completing the work.

The work undertaken in the four year delivery program will coincide with the Local Government election cycles. Council looks forward to the successful realisation of the goals within the Community Strategic Plan.

Blayney Shire Council 2025: Community Strategic Plan

WHAT THE COMMUNITY DETERMINED......

Our preferred future

(What we want Blayney Shire to be in 2025)

Our Shire of welcoming communities

The many communities of the Shire's town, villages and settlements are supportive and welcoming to those who live here and also those who visit.

Beautiful and productive landscapes

The landscape in which we live is both beautiful and productive.

Rural and mining heritage

Our heritage of rural living amidst agricultural and mining production has taught us much about the nature of these activities and how they can exist in harmony.

Showing the world how agriculture, mining and industry can work together for the greatest good

We are eager to share these lessons and learnings with other communities around the world.

A place to live your dreams

In Blayney Shire there is both space and time to make and live your dreams!

Values

These are the values that will guide our future choices and the way we work together as a community.

With a generosity of spirit we will:

Be inclusive and united

Act honestly and respect each other

Have a "can do" attitude

Think outside the square and back ourselves

Blayney Shire Council 2025: Future Directions

The Blayney Shire Council **2025** Community Strategic Plan provides a strategic framework for Blayney Shire over the next decade and beyond. The identified outcomes and the strategies will only be achieved through the collective input of government and non-government agencies, businesses, community organisations and individuals.

The strategic outcomes are grouped into five themes:

- 1. Grow the wealth of the Shire
- 2. A centre for sports and culture
- 3. Preserve and enhance our heritage and rural landscapes
- 4. Develop and maintain Shire infrastructure
- 5. Develop strong and connected communities
- 6. Leadership

Introduction – What is the Delivery Program?

The **Delivery Program 2014/15- 2017/18** is one layer of the Planning and Reporting framework that all NSW Councils must develop to meet the requirements of the Local Government Amendment (Planning and Reporting) Act 2009. It outlines the work Council can do to achieve the Future Directions outlined by the community in the Community Strategic Plan.

The three tiered planning process ensures that there are clear links between the long term goals of the community and the activities of Council. The diagram below demonstrates there linkages:

Community Strategic Plan 10 years+ For the whole of the Shire not just Council **Vision Delivery Program** (what we want the Shire to be) (4 years) **Values** Where Council has a role (to guide future choices and Supported by: behaviour) Financial Plan **Future directions** Asset Management Plan (groupings of similar work) Workforce Plan **Operational Plan Strategic Outcomes Strategic Outcomes** (Where Council has a role) Councils role Annual Provider, Facilitator or Advocate **Actions** Actions **Programs** Programs **Projects Projects** Budget **Performance Measures Performance Measures** Tasks The What and How The How The What

The Delivery Program is a vital tool for the ongoing planning of services and programs of the Blayney Shire community. It replaces the former 4 year Council Management Plan and is designed to be a single point of reference for all the activities undertaken by Council during a term of office. All plans, projects, activities and funding allocations must be directly linked to this program.

Resourcing Strategy

As part of the Integrated Planning and Reporting Framework councils are also required to develop **resourcing plans** that support the achievement of activities and tasks within the Delivery and Operational Plan.

These plans include:

Long Term Financial Plan –

The Long Term Financial Plan is an important part of Council's strategic planning process. This is the point where long-term community aspirations and goals are tested against financial realities. It is also where Council and the community may decide what resources councils need to influence and work with other parties so that they might deliver on responsibilities. (Integrated Planning and Reporting Manual, DLG)

Asset Management Plans

The Asset Management Policy is a council endorsed policy which sets the broad framework for undertaking asset management in a structured and coordinated way. It outlines why and how asset management will be undertaken. It provides a clear direction for asset management and defines key principles that underpin asset management for the council. (Integrated Planning and Reporting Manual, DLG)

Workforce Management Plan

An effective workforce strategy aims to provide Council with the people best able to inform its strategic direction, develop innovative approaches to complex issues and deliver appropriate services effectively and efficiently. (Integrated Planning and Reporting Manual, DLG)

The Resourcing plans should be read in conjunction with the Delivery and Operational Plans

Community Engagement for future funding (Special Rate Variations) and service delivery.

As shown by the community engagement actions in the CSP, Council has determined that to meet the long term future delivery needs of the community that its current levels of funding are not adequate. This has been identified in the Long Term Financial Plan and is based around the shortfall in funds to renew, replace or maintain assets (roads, bridges, buildings, etc.) across the Shire.

Council has been working to reduce the infrastructure backlog and to determine the service levels that the community can accept as it worked through its asset, workforce and financial plans since 2011.

Council and it staff have made changes to how it engages with its community. It has restructured its committees to be predominantly of a community representative nature and to ensure that it is receiving the advice from village committees, sporting groups, business, special interest groups and from a wide community cross section.

Council has been consulting with town and village committees to increase their knowledge of how and why council functions and to provide support to these committees and the residents to promote, enhance and comment on Council's future service and financial delivery.

Council has also commenced the surveying of the community and its staff members to identify priorities and to become aware of how it may enhance its delivery of services both within the rural sector and to the villages. Council has extended this to develop focus groups such as through the Women's Forum and to ask people to register as email participants on the council web site, face book and twitter.

Council has also undertaken research as to the community's ability to meet long term financial commitments and to review how the ratepayers across the Shire are impacted currently and in the future.

To ensure that the community is informed, Council has utilised websites, Facebook and other social media sources, print media, radio and television. Council has also provided information for surveys, special rate variation and other communications in written form and web based. Council has posted community newsletters, surveys and information on special rate variations to ratepayers, households and made these available on its website.

Decisions made by Council for the Special Rate Variation have been made based on the principles of community engagement under this plan and reflect the levels of engagement of Involve, Consult and Inform. Special Rate Variation decisions and outcomes are contained in the Integrated Planning and Reporting Documents placed on public display and available on the Council's web site. The Long Term Financial Plan is the principal document that identifies future revenue, funding and asset renewal, replacement or maintenance.

The Path to Financial Sustainability

In June 2012 Council adopted a Financial Strategy to provide direction and context for decision making in the allocation, management and use of Council's financial resources. The Strategy set the parameters within which Council would operate to ensure that Council remained financially stable. The strategy seeks to ensure that Council lives within its means while stating the need to develop actions in consultation with its community to move towards sufficient infrastructure works (maintenance and renewal) to ensure that service levels do not diminish and intergenerational equity is maintained. The strategy also seeks to ensure that Council has sufficient cash flows to remain financially sustainable over the life of the Long Term Financial Plan.

Council's Projected Financial Position

Council's Financial Sustainability Rating is **moderate** while its short to medium term financial capacity is considered to be **negative** with a by the NSW Treasury Corporation ('T-Corp')(2012). Council has:

- a large portfolio of operational and community assets,
- balanced cash flows over 10 years,
- a positive financial asset position within low levels of debt, and
- strong cash holdings that provide capacity to manage normal variations in operational performance or provide opportunity for future investment.

The key to long term financial viability, however, is the operational performance of an organisation. Based on current funding levels Council's pre-capital operating forecast continues to be in deficit around \$2M per annum over the next 10 years after allowing for achievement of the savings program. Furthermore there is a significant underinvestment in asset renewals leading to a growing larger gap in asset backlog—a clearly unsustainable position.

The longer term outlooks shows little sign of improvement. Whilst Council continues with its attempts to increase funds available for capital works, the consumption of assets (depreciation) continues to outstrip the funding available for renewal.

TCorp considers these issues to be significant and could impact the long term financial sustainability of Council. Further ongoing cost controls or securing new or additional revenue in future years is recommended by TCorp to address these issues.

The Division of Local Government (DLG) who has an oversight and monitoring responsibility for local government performance in New South Wales, has also indicated that Council needs to more strongly demonstrate how it intends to achieve financial sustainability over the longer term through its Resourcing Strategy. Council's existing Resource Strategy recognises the asset dilemma faced and that the challenge will require us to either increase our revenue, or make concessions on our services or levels of service.

How we begin to take this issue

Council's endorsed Delivery Plan identifies an deliverable to:

'Maintain a stable and secure financial structure for Council.' (DP6.2.3).

Guidelines set by the Independent Pricing and Regulatory Tribunal (IPART) indicate Councils need to have the conversation with their community about any rates increases in the context of its Delivery Program, Resourcing Strategy and Operational Plans.

Community involvement is required in determining the service levels that are appropriate for the community's needs, and the community's capacity and willingness to pay increased rates.

This revised document reflects an approach and options to address Council's Financial Sustainability. The program includes actions which see a continuation of efficiency gains, improving revenue streams where feasible and consideration of services and service levels. Rates increases are part of the picture and are one measure amongst a range of other actions to improve the long term viability of the Council. Current and proposed additional actions include:

- service and operational reviews and adjustments such reviews would consider service levels, pricing and productivity measures,
- internal budget harvesting, centrally controlling some expenditure and setting revised revenue and expenditure parameters,
- staff structures, establishment levels and delivery methods,
- continued redistribution of capital funds into renewal rather than creation of new assets,
- fees for services,
- asset rationalisation,
- review of subsidisation, grants and donations,
- entrepreneurial and shared service options,
- preparation for potential rate increase application.

How we involve the community

It is far better that these actions happen now to curb the trend toward longer term decline, and to minimise any impact on services to the community. It is important the community are informed of the longer term financial position of the Council, and that they are involved in decisions made about actions to manage it.

Council will continue to review its Delivery Program, Resourcing Strategy and Operational Plan (including Budget) to factor in a financially sustainable target for the organisation and to ensure our operating budget is in balance yet work towards addressing the asset backlog while keeping 'Intergenerational Equity' with maintenance of our assets. Strategies to achieve this must be affirmed with the community, and the conversation has started and will need to commence again almost immediately.

Council will continue to work with the community in addressing this dilemma.

CONSULTATION AND COMMUNICATION

A financial sustainability target has been set as part of Council's Integrated Planning and Reporting documents and further consultation around financial sustainability will feed into community engagement processes for the Delivery Program, Resourcing Strategy and Operational Plan.

Engagement will need to result in a position from the community on how Council is to achieve long term financial sustainability. The conversation with the community is likely to be iterative to consider community views on services and willingness to pay or seek alternatives to funding priorities. Council has resolved to present further SRV proposals to the community as resolved at its November 2013 meeting.

THE FIRST PHASE OF OUR PATH TO FINANCIAL SUSTAINABILITY

The Process

Over the last 18 months Blayney Shire Councillors and the staff have been undertaking a detailed review of the future direction of Council and the level of services required, to ensure that the Shire roads, bridges, buildings, parks and ovals and community service levels are maintained at a high level. Council's review has recently been confirmed at village meetings and by the community survey that was undertaken where the respondents identified that roads, bridges, and recreational facilities are a high priority to this community.

Based on the resolution of Council at its meeting held 11 November 2013 (shown below), Council has undertaken a detailed review of its assets and has inspected the bridges, the roads, footpaths and buildings to identify unfunded maintenance works. This review is part of the Integrated Planning and Reporting (IP&R) requirements of the NSW Government and has required Councillors to take a detailed look at the organisation and to ensure that it is heading in the direction that residents, identified in the development of the IP&R (community direction) documents. Under these rules, Council is going to the community to seek advice on the revised ten year program that acknowledged what the community wanted and to provide advice to the community on the delivery of those items, review the conditions of its assets (roads, bridges, footpaths, buildings etc.), to determine its workforce and to produce a budget that could fund the works and services for ten years.

The work undertaken in the review of the assets, budgets and the IP&R documents has highlighted that Council due to rate pegging over many years has fallen behind in what it can afford. Without a Special Rate Variation (SRV) we will continue to fall further behind and our roads, bridges and other service areas will continue to deteriorate and become unusable.

The Council has undertaken consultation with the community about introducing a Special Rate Variation (SRV) and has discussed the acceptable level the community can afford and the expected level of service they require Council to meet into the future.

Council had discussed and determined that it would present to the community the basis of a SRV and to allow the community to give feedback on the level of service that they believe is acceptable. A community survey was conducted that identified service levels and item importance.

Council has also undertaken an independent review of the SRV to determine if the community can afford the SRVs proposed and to identify groups that may be disadvantaged by such an increase.

Based on the IP&R process and the independent review undertaken by the Western Research Institute at Bathurst, the following permanent SRV options were presented to the community;

- 1. Reduced Services Model 3.3% being the proposed rate cap each year (current situation) for all rating categories. This is subject to variation by IPART annually and the rate cap percentage may vary from 3.3%.
- 2. Maintained Services Model 10.0% per annum over 4 years (cumulative and permanent) for all rating categories which includes the rate cap proposed by IPART annually.
- 3. Road to Infrastructure Improvement Model -15% per annum over 6 years (cumulative and permanent) for all rating categories which includes the rate cap proposed by IPART annually.

Council has also sought a financial sustainability assessment by NSW Treasury based on the Road to Infrastructure Improvement Model.

The proposed models have been discussed with the community, and that the information has been made available to inform the residents of the limitations to future budgets around each service model. The community has expressed an expectation that the elected Councillors will ensure that assets are maintained to a reasonable standard and that improvements are made to reduce long term deterioration. A SRV is required to ensure that we do not down grade assets and those services will be available to future generations.

To ensure that the Community was aware of the proposed special rate variations being considered, Council held 9 community meetings and one requested meeting with the NSW Farmers between 15 and 31 October 2013.

The community was provided with an overview of the special rate variations and Council's reasoning for consideration of the need for these. A handout was provided to all community members and the community was encouraged to ask questions on the SRV.

Council has also provided information on its website, Facebook and Twitter accounts and has included the SRV in the community newsletter posted to all ratepayers. The

SRV has also been reported in the local media. Further, Council placed a rates calculator on its website to assist ratepayers to assess its impact.

Council provided attendees with the simple survey results from the village community meetings held up to 24th October that indicated:

- 45% were in favour of the 15% variation over 6 years
- 35% were in favour of the 10% variation over 4 years
- 22% were in favour of the 3.3% variation (current rate peg)
- 3% were informal

The meeting with NSW Farmers saw an overwhelming majority of attendees in favour of the 3.3% variation (current rate-peg).

The Outcome

Council considered the discussion held at the community meetings and the advice from the survey taken at the meetings at a workshop on Monday 4th November. This workshop was to consider the level of special rate variation and the report submitted by Western Research Institute as to the affordability of the rates for all people living in Blayney Shire. This has been further compared to the survey results from the community as to what they want to see for the shire and how they believe the current situation exists.

At its Ordinary meeting held 11 November 2013 Council resolved the following:

- That Council apply to IPART for a Special Rate Variation of 6% across all rating categories for 2 years starting 2014/2015 financial year excluding existing Special Rate Variations in place;
- 2. That Council modifies its Long Term Financial Plan to project rate increases of 6% for Farmland rate category and 10% for all other categories, excluding existing Special Rate Variations in place, for 4 years starting financial year 2016/2017;
- 3. That Council undertake a review of the rating structure to combine rate groups and review the base rate for the new rate descriptions;
- 4. That Council provide advice through the local media and councils newsletters as to the decision of Council on the special rate variation; and
- 5. That Council work with Village committees and NSW Farmers to consider, review and develop the future special rate variation from 2016/2017.

Where the funds will be spent

Funding from the proposed permanent 2 year 6% p.a. Special Rate Variation will be focussed upon the Asset and Infrastructure Renewal programs incorporating the Village Enhancement program

	2014/15 (\$'000)	2015/16 (\$'000)
Income		
Special Rate variation permanent 6%p.a. 2 years	147	433
Expenditure (Capital)		
. , , ,		
Asset and Infrastructure Renewals	147	433
incorporating Village Enhancement Program		

Note: This Special Rate Variation is part of a longer term funding model for asset renewals. Council's Long Term Financial Plan shows more detail of this 10 year strategy. In the event that Council must deliver services under the Reduced Services model a review of loan borrowings, funding from reserves in conjunction with a service delivery review will be required.

CONCLUSION

Financial Sustainability is a key focus for local government reform. Council has recognised the need to address our long term financial outlook through implementing a number of measures in the past, including a Financial Sustainability Strategy. Actions in addition to our savings program are needed to achieve long term financial sustainability, to ensure that the standard of Councils public assets are fit for purpose over the medium to long term.

Council has sought to address this challenge in the short term with an approach that balances community affordability with financial sustainability for service delivery and maintenance of community assets. The following approach to financial sustainability has been proposed:

• 2 year permanent Special Rate Variation of 6% across all rate categories, excluding existing special rate variations in place.

These additional funds will assist Council to ramp up its asset renewal programs with a view to addressing the funding gap and provide for village enhancement.

Council will also seek to commence work on the next phase of its path to financial sustainability with a community engagement program consulting the community on funding and services in the medium to long term.

N.B. This page has been updated since adoption to correct the details and figures disclosed above to align with the LTFP. The figures used are forecasts available at the time and are subject to variation until adoption of the Operational Plan for the respective year.

Blayney Shire Council Delivery Program

The Blayney Shire Council Delivery Program has been summarised into easy to read tables that will enable the integration of all Planning documents.

The design of each table is based on the following:

Future direction	Council role	Responsible Staff Member	Department
A future direction from the Community Strategic Plan	The roles Council undertakes when seeking to achieve the future direction:	Manager responsible for delivering the work	The department of Council with responsibility
	Provider Facilitator Advocate		

Strategic outcome

The desired outcomes associated with achieving the future direction

Linkage to other plans

Other plans associated with the strategic outcomes
