Submission: They said if councils merged then they could not apply for a rate rise. They merged. Stick to the rules. Victoria street Taree roads are currently being replaced as always just before financial year ends so they had money sitting somewhere. Why would they need more for roads when they're clearly just spending it now rather than losing it. If that road needed doing so badly why wasn't it started before now? Sick of great mistakes council aka midcoast council ripping off homeowners with already extortionate rates. Enough is enough. We pay \$70 a week as it and cannot afford to pay more.
