Submission: I don't believe that there has been sufficient explanation or justification from Randwick council as to the requirement and investment of this 20% increase. There is a push for construction of new infrastructure, when the current infrastructure such as Halls/Community Centres are not currently easily accessible to rate payers at affordable prices, and are not maintained to a suitable standard (e.g. Totem Hall and Randwick Community Centre). I would request much further consultation with the rate payers with detailed explanations of investments before requesting such rate increases.
