Submission: I don't get a 7 1/2% pay rise yearly I don't see why I need to pay the council more, none of the items on their documents will be of benefit to me.

When asked at a community meeting how much was going to go to the councillors as apprise and there was no direct answer!

Why make such a great increase of rates when they realise people cannot afford it with the cost of living rising why do they think they should get the lions share of my hard earn money?

Please don't let this happen to us
