Submission: I feel this special rate review will put extra financial strain on not only daily budgets but affordability in the area. It's unfair in landlords having to get hit on your own property and then again on rental property. This will then cause rents to be put up otherwise the tenant is never paying for the infrastructures. And I'm concerned over the pricing / cost of planned projects, as these expenditures will just increase when over more than a year in planning and estimations and when they are finally completed
