Submission: Marrickville council as a stand alone Council has direct responsibility for a number of issues relating to
:* Air Traffic;

Maintaining a clean & green environment through their native tree planting initiative - this has a direct impact on energy consumption for residents as well as pollution abatement.

*Architectural Integrity;

In our north ward there is a strict adherence to maintaining the federation style streetscape through strict Development Application requirements that current residents value & cherish.

I do not believe a super council will have the capacity to protect these interests further making it more difficult for individual voices to be heard as there will be a multitude of interests to be dealt with impacting greatly on social & environmental outcomes in favour of economic interests only.
