Submission: We support the Hawkesbury City Council's submission for a SRV. We have lived in the heart of Windsor for 15 years and the non-investment of Council has led to the slow decline in our town centres. Small businesses closing, building owners not putting in the appropriate amount of investment to maintain their buildings - and why would they, when the leading authority here doesn't do likewise in public spaces. We now has a future thinking group of Councillors and a new General Manager who have done an amazing job of mapping out what it looks like to have our Council area maintain properly, providing community programs and events, beautifying our town centres and parks, and going further to give the people in the Hawkesbury the same level of services our surrounding LGAs receive. As far as we know, we haven't had a SRV in the Hawkesbury, and it is about time we had a small increase in rates to fund what our community needs and wants to maintain the viability of our towns, increase tourism potential.
