Submission: The rate rise for Port Stephens Council was voted down by 75% of the rate payers yet the council vote that one in as it was the highest possible rate rise for them to line their pockets with. I do not want this rate rise to be effective as it is far too high a jump for the region. The council are supposed to speak for the majority of their constituents not the minority. That is why we voted them in to make decisions for the people not their own benefit. I oppose this rate rise.
