Your submission for this review:

As I reported earlier in the restrictive 200 character survey, fare evaders are prevalent on buses, trains and ferries. Unless Transport NSW are sincere and employ more staff on these public transport facilities, all metropolitan public transport should be free to encourage communities to get off the road and stop polluting our atmosphere. Long distance state and interstate transport must be booked and paid for on-line already available as these forms of travel are more expensive and dont involve day-to-day employment.
