Your submission for this review:

The current economic climate impacts all middle- lower income earners. The willingness to have OOHC foster children impacts the micro economics of running a home, housing children, meeting all their deep emotional and disturbances around displacement, their social commitments such as sporting activities, medical attention including dental, optometry, psychologists, behaviour specialists and accessing extra support for learning difficulties, as well as shelter, utilities, and car running expenses. Equity needs means that a raise in the allowance (current @\$1 0/h) is a reasonable request.
