Submission: To whom it may concern, the council has already in the past had an extra rate increase , and seem to be unable to run efficiently they have poor work ethics and a lazy culture coupled with a tendency to waste many on silly projects , we in the Clarence are one of the poorest communities on the east coast and this will cause hardship , as the highway is to be moved and there will be a time of change and we don't need this on top of a already struggling community.
