Thank you for your the goverment's effort to cut cost of living. But I would like to inform you a simply way to save cost of living in NSW related to Opal Fare. I remember during Covid period, the opal card's peak hours has extended to 10am in the morning (before covid was 9am) in order to discourage people to take public transport during Covid. However this year the situation settles and back to normal, but the PEAK HOURS rule doesnt switch back to pre-covid time. Please consider to switch peak hour back to normal so people can save some transport cost (it means taking train after 9am is cheaper which is the pre covid rule).
