My household with children, myself on disability would not be able to pay higher water bills, I am already on a government pension & struggling to survive. With my own rates increased up to \$439.00 already due to rates theres no way I can survive. We should not be held responsible for councils abismal spending record, then the massive wages were paying ██████ to run things. It says a lot when one man runs the council. We cant afford this rise as well as rates & survive. Considering the work by the council has always been bad with 10 workers to dig one hole, theres the reason. I cant believe for all the over spend our area is in terrible shape, flooding due to blocked drains, pot holes everywhere. This is not ok & never has been.
