Hi, I am writing in regards to the propose water price increase. I am an irrigator that uses water to grow food and fodder. The proposed price increase would see my business and many other irrigation businesses not viable in the future. Farming is already a difficult profession, that has very tight profit margins. The increase in fees would be devastating. I also have 4 young children that i want to have the opportunity to be involved in irrigation farming in the future. With the proposed increase this would not be possible. Thank you.
