Your submission for this review:

Dear Sydney Waters, With the current interested rates n energy bills, we are really struggling to survive. If possible Sydney water should consider holding the increase on water rates, at least for a year or till the interest rates ease. Please do consider middle class families with children who are struggling a lot. Every dollar will make a difference. I do not support the increase at the movement and I totally understand the sustainability of Sydney waters as well. 18% is too high, do consider 5-8% not 18. Kind Regards ■
