The minimum fare should be raised for rank hail to at least \$10 as its very difficult to keep drivers in the industry when they sit on taxi ranks and get \$7 or \$8 fares after waiting for 1hr or more I believe that the minimum Uber ride for passengers is around \$10 Also I think the removal of the \$1.32 levy as soon as possible would help ,or possibly leaving it to cover a pay rise for the under paid driver's. And fare increases should reflect at minimum CPI which they haven't if you want a good service just like any other industry you need to pay workers well enough to make them want to work. As a crucial part of public transport we want good drivers if there is no money it you will have bad drivers that don't care much.
