CENTRAL COAST WATER IS NOT FIT FOR CONSUMPTION!!!! Do NOT drink the water!!!! It is HAZARDOUS to health!!!! It is high in sulphur. Ever noticed the bad egg or sewer smell when you turn the tap on? It's not your pipes or drain, it's the water. Ever noticed the stench of chlorine coming from the water? The pipes are flushed with chlorine in an attempt to remediate the sulphur. The health implications are TERRIFYING!!!! WHY should I pay more for water that is harmful to my health? I am STRONGLY OPPOSED to a price increase!!!! Provide the Central Coast with potable water first and then let's discuss a rate hike.
