Not agree at all! The propose price will kill off public as it is too extorbitant. 18% is ridiculous plus another 7%. The society is already struggle so much with the living cost crisis and then you add the water bill which basically human rights. You are choking us literally. For the CEOs and all managers of sydney water who proposed this, take out you pay and bonus. You certainly don't care about your customers. This will ruin your and the company's reputation and image. Be ready to be seen as money grubbing company. If you need to increase, make a more reasonable %. Maximum of 7% for next year and 3-5% for next one will be more tolerable. Follow the increase in wages. Don't be another companies like those supermarkets to be sued to the court!
