Your submission for this review:

I would like to express my concerns about the proposed Water NSW and the water administration ministerial corporation proposed charges for the next 5 year determination. I ask IPART when considering the determination to consider the impact increases of these charges will have on our small family business, with the proposed increases of 15% + CPI annually over the next 5 years. The result will be at the end of the 5 years our pass through charges will have increased by approximately \$67,000 per annum. Being a primary producer there is no way I can pass these costs through so it will come off the bottom line of our business which will affect the viability of our farming operation. I ask IPART to give some serious consideration to the flow on effects to our farming business and community which we support. I also ask IPART to put their thoughts to and come up with a solution of how I can pass through these charges. I am a Coleambally farmer who lives and farms in an IIO.
