Submission: The city of Sydney provides me and my community with all our needs in its current form. The characteristics of the CBD and its surroundings differ from a more suburban area, and these areas should be treated differently. They have different agendas and the political leaders running these councils will all have different and differing agendas. The people of the city of Sydney are happy with the current local council and are not seeking change. The NSW government should respect the voice of the people of the city of Sydney and not force change as this will do. Clover Moore is an effective mayor and has the support of the community. Her position should not again be compromised by politics the way it has been compromised in the past. Leave the city of Sydney alone.
