Q6. What's is currently missing? Assurance of like-for-like offsets and net gain for biodiversity. Q7. What form of oversight would be needed to ensure confidence in the market? Assurance that offsets are successful in increasing biodiversity. Additional Comments: Stop allowing payments to Biodiversity Conservation Fund as a form of offset - offsets must be up front, like-for-like and create net positive benefit on the ground. Where no like-for-like is available, this indicates the loss cannot be offset so should not go ahead. Paying into a fund is not a viable alternative.
