Your submission for this review:

I do not support Weddin Shire Councils (WSC) application for an Additional Special Variation. The demographics of the Weddin Shire show that the median age is 51 and 1,876 residents are over the age of 50. The ratepayers and residents of the Weddin Shire are facing increasing pressures on their budgets with rising interest rates, rising petrol prices, rising inflation, increased insurance premiums, lack of and increasing costs of affordable and appropriate house and other increasing costs of living. Also with the older population in the WSC should fix up the uneven and broken footpaths around the town. There are a number of streets that do not have footpaths which makes it hard for the elderly residents to walk around the town. I am also concerned with WSC that at the last Local Government Election the Councillors were elected than shortly after four of the Councillors resigned and the reason why three of them has not been made public. The three new Councillors received low number of votes. I am also concerned with the poor management of the Grenfell Main Street upgrade which has dragged on for ages with major delays and cost overruns as per the attached photo.
