IPART Independent Pricing and Regulatory Tribunal | NSW

Monitoring the NSW Biodiversity Credits Market

Workshop for credit sellers

27 September 2024

Welcome and Acknowledgement of Country

Jonathan Coppel
Tribunal Member

Agenda

- 1 Overview of IPART's role and this review

- 2 Overview of the market in 2023-24

- 3 Key issues for this year's review

- 4 Discussion and questions

Introductions

Stakeholder workshop

Overview of IPART's role and this review

What is the credits market's role in protecting biodiversity?

Our role

Monitor the performance of, and competition in, the NSW Biodiversity Credits Market over a 3-year period.

A well-functioning credits market brings together credit buyers and sellers to effectively and efficiently trade the credits needed to offset unavoidable impacts on biodiversity.

2022-23 Annual Review: Key findings

Our analysis of the biodiversity credits market over 2022-23 revealed it is not operating effectively in 5 key areas:

- 01 The option for development proponents to pay into the Biodiversity Conservation Fund prevents the market from developing.
- 02 High up-front costs and long credit generation times create a lag between credit demand and supply. The Credits Supply Taskforce work program is making a difference.
- 03 Market participants lack accurate and timely information.
- 04 High transaction costs and market complexity discourage participation.
- 05 Stakeholders lack confidence in market oversight and governance, which hinders their participation.

2022-23 Annual Review: Our recommendations

There are fundamental issues that, if unaddressed, will continue to prevent the market from functioning effectively. We have therefore recommended priority actions.

Phase out the option to pay into the Biodiversity Conservation Fund

Establish interim measures to reduce proponents' reliance on the Fund pay-in option

Continue to intervene in the market to reduce entry costs, make trading more efficient and instil confidence in the market

Other actions may improve participants' experience in the market but won't improve performance and competition if the priority actions are not realised.

Objectives of this workshop

Share and discuss our initial analysis of the market in 2023-24

Provide an opportunity to raise issues we may have missed and ask questions of the Tribunal and IPART Secretariat

Identify the most important issues to consider in depth for our 2023-24 Annual Report

Assist us to understand issues where the data doesn't tell the full story

Stakeholder workshop

Our review in 2023-24

Credits market growth in 2023-24

101,000

Credits transferred between
proponents and landholders

↑ **26%** from last year

\$226m

Value of credits transferred
between participants

↑ **106%** from last year

54

New Biodiversity
Stewardship Agreements
signed

↑ **29%** from last year

Use of the Biodiversity Conservation Fund

10,865

Credit obligations transferred by payment to the Biodiversity Conservation Fund

↓ 46% from last year

\$64m

Value of payments made into the Biodiversity Conservation Fund

↓ 21% from last year

Biodiversity Conservation Fund obligations acquired and acquitted

We understand that the BCT will acquit a significant number of credits that were contracted for purchase in the 2023-24 financial year.

Those acquittals are not reflected in the data shown in this chart.

2022-23
Total credits traded - 80,370

2023-24
Total credits traded - 101,006

Buyers in the
credits market

Key focus areas for this year

The role of government organisations in the market

Confidence in the market

Quality of information

The need for continued market oversight

Barriers to entry for Aboriginal landholders

Impact of price changes in the Biodiversity Conservation Fund

Discussion and Q&A

1. What has been your experience selling credits in the last one year? Have you been able to find buyers efficiently?
2. How does the presence of the Biodiversity Conservation Fund and Credits Supply Fund influence your ability to sell credits in the market?
3. What has been your experience working with brokers, accredited assessors, consultants or other third-parties in the market?
4. What additional information (or improvements to existing information) would improve your experience in the market?
