Core responsibilities, duties and accountabilities
<p>Strategy</p> <ul style="list-style-type: none"> Oversee and develop the financial and operational well-being of Altogether Group by creating an environment and culture that focuses on fulfilling Altogether’s vision, and values. Partner with the executive management team to provide guidance on operational and strategic issues as they arise; including provision of strategic recommendations to direct reports based on financial analysis and projections, cost identification and allocation, and revenue/expense analysis. Develop business prospects by studying economic trends and revenue opportunities; project acquisition and expansion prospects; analyse organisational operations; identify opportunities for improvement, cost reduction, and systems enhancement; and accumulate capital to fund expansion. Oversee financial performance and risk profile while ensuring that all compliance and regulatory obligations are met; manage the design and implementation of new products/services; guide brand development and the implementation of effective marketing strategies. Represent Altogether at business functions, community events, industry training and events, and networking opportunities.

- Cultivate relationships and maintain open communication channels with shareholders, government entities, stakeholders, the public and the media.
- Engage the Board around issues, trends, and changes in the operating model and operational delivery.
- Update job knowledge by remaining aware of new regulations, participating in educational opportunities, reading professional publications, maintaining personal networks, and participating in professional organisations.

Financial & Operational Management

- Monitor company performance by measuring and analysing results, initiating corrective actions, and minimising the impact of variances.
- Oversee the budgeting process, and the implementation of budgets, so as to monitor progress and present operational metrics both internally and externally.
- Ensure timely and accurate reporting of key events regarding operations to officers, managers and other appropriate stakeholders to keep all relevant parties informed.
- Oversee the preparation and approval of all operational and financial reporting materials and metrics for Altogether's board of directors; including monthly and annual financial statements.
- Report to the Board of Directors with accurate and timely information regarding Altogether's overall performance, including financials, risk ratings, compliance and growth prospects.
- Increase revenues and income; implement operating cost controls in the areas of staffing, supplies, purchased services where needed.

Team Management

- Develop and manage direct reports; guide larger multidisciplinary teams outside of direct reporting lines.
 - Engage other members of the senior management team to facilitate cross-department collaboration to ensure that all departments and senior management support Altogether's evolving strategy, operational delivery, and data collection needs.
 - Ensure Altogether is staffed with well-trained, high-quality, values-aligned and engaged employees at all times.
 - Work closely with the executive management team to develop effective hiring, training, and compensation plans to attract and retain quality talent.
 - Lead and guide employees with a focus on consensus building, engaging and empowering them to be successful in serving stakeholders and customers.
 - Provide guidance on attracting and developing key team members for Altogether as and when needed.
- Demonstrating quality workplace practices consistent with Altogether's quality policies and procedures.

Risk Management and Compliance accountabilities

- Behaving in a professional, careful and conscientious manner that contributes to an effective risk management and compliance culture.
- Compliance at all times with Altogether's policies and procedures and with the law.
- Reporting potential and actual compliance breaches and new risks.
- Keeping up to date with relevant changes in legal and other requirements, identifying and reporting compliance breaches, identifying and assessing risks.

Workplace Health & Safety accountabilities

- Executing a duty of care that ensures the health, wellbeing and safety of self and others at all times.
- Demonstrating safe workplace practices consistent with Altogether's WHS policies and procedures.
- Proactively identifying unsafe workplace conditions and/or practices and taking preventive and corrective actions as applicable.
- Key contributor to workplace safety improvements, particularly in relation to infrastructure design, construction and commissioning practices.

Environmental accountabilities

- Executing a duty of care with regard to the environment
- Demonstrating workplace practices consistent with Altogether's environmental and sustainability policies and procedures.

Quality accountabilities

- Understand and execute quality standards outlined in Altogether quality and management plans, policies and procedures, including the Business Management System and ISO 9001 Quality Management Systems.
- Take ownership of work, participate in quality improvement training and track quality performance to continually identify methods for improvement
- Build and retain channels to connect with customers and get instant feedback

Qualifications & Experience

Qualifications:

- MBA or bachelor's degree in business, finance, accounting, or equivalent experience.
- Master's degree preferred.

Experience:

- Minimum of 10 years at senior leadership and or senior management level, including extensive commercial experience.

Skills and Personal Attributes

Skills and Attributes:

- Mature and proactive, with evidence of having worked with integrity as a valued and respected leader of a similar sized organisation.

- Demonstrated excellence in leading an organisation, managing teams, ensuring profitability, steering culture and providing a living example of the 'way we do things around here.'
- Skill in examining, developing, reengineering, and recommending policies and procedures across the entire organisation.
- Strong analytical skills and experience interpreting a strategic vision into an operational model.
- A collaborative and flexible style, with a strong service mentality. Needs to be seen as a team player who is committed to lifelong learning.
- A hands-on leader with integrity and a desire to work in a dynamic, mission and values-driven environment.
- An effective communicator, with strong oral and written skills.
- Strong commitment to developing team members.
- In-depth understanding of the industry including risk management, compliance, and regulatory requirements, with a passion for Altogether's' mission.

Other relevant requirements:

- Flexibility to travel
- Driver's licence
- Full Covid-19 Vaccination

Important additional information

The manager will discuss all elements of the role brief with the post holder, it is recognised that role requirements may change over time to align with business need.

The information contained within this role brief is provided for guidance, is not contractual, and is not an exhaustive list of all accountabilities that the post holder may have.

As Altogether is a geographically dispersed organisation there may be a requirement to travel to other sites in support of business delivery.

Position title	Process Engineer
Reporting to	Water Scheme Operations Manager
Functional team	Operations
Location	Altogether Head Office, with travel to all site locations as required
Date	Converted May 2021 (last content edit Oct 2019)

Purpose of Role

The primary purpose of this role is to identify, define, implement and manage continuous improvement of the Local Water Centres (sewage and/or stormwater treatment facilities), water distribution and sewerage networks and on-property infrastructure within Altogether Systems' (Altogether's) water utility schemes in order to provide:

- a reliable and safe supply of drinking and/or recycled water (where applicable) and
- sewerage services.

The role will ensure compliant water quality, public health, safety and customer requirements are continually met in an efficient and sustainable manner in the provision of these products and services.

Key relationships

<p>Direct reports:</p> <ul style="list-style-type: none"> • Nil 	<p>Key internal stakeholders:</p> <ul style="list-style-type: none"> • Operations team • Retail team • Project Delivery team • HSE Manager • Risk & Compliance team • Finance Team 	<p>Key external stakeholders:</p> <ul style="list-style-type: none"> • Altogether Systems customers • Contractors and suppliers • Building/Facility Managers • Public utilities and Councils • Regulators (e.g. IPART, NSW Health, EPA)
--	--	--

Core responsibilities, duties and accountabilities

- Establish and manage performance management frameworks for Local Water Centres, water distribution and sewerage networks and on-property infrastructure that allow the Operations team to assess compliance with Altogether's policies and procedures, regulatory requirements, customer expectations and industry best practice including financial targets.
- Identify, design, obtain approval and implement performance management improvements for Local Water Centres, water distribution and sewerage networks and on-property infrastructure that allow the Operations team to comply with Altogether's policies and procedures, regulatory requirements, customer expectations and industry best practice including financial targets.
- Design and implement short term and long term water quality results evaluation including reviewing and analysing results (laboratory and plant analysers) to ensure compliance.

- Oversee and identify improvements to the process control and monitoring systems including field devices, programmable logic controllers and SCADA systems.
- Provide process support and technical expertise to the Operations team as required.
- Work with the Project Delivery team in the design, construction, commissioning and transition to operations of Local Water Centres, water distribution and sewerage networks and on-property infrastructure.
- Manage process engineering consultants in their provision of products and services on Local Water Centres, water distribution and sewerage networks and on-property infrastructure.
- Respond to requests for information from both internal and external stakeholders as required.
- Support, and develop content for, implement, and ensure adoption and improvement of relevant Business Management System documentation.
- Support other facets of Operations as required from time to time.
- Be an ambassador for maintaining and improving Altogether's brand to all stakeholders including clients, customers, supply chain, and regulators.
- Demonstrate workplace practices consistent with Altogether Systems' policies and procedures.
- Drive the continuous improvement and planning activities including the development of business cases as required

Risk Management and Compliance accountabilities

- Behaving in a professional, careful and conscientious manner that contributes to an effective risk management and compliance culture.
- Compliance at all times with Altogether's policies and procedures and with the law.
- Identify and report potential and actual compliance breaches and new risks.

Workplace Health & Safety accountabilities

- Executing a duty of care that ensures the health, wellbeing and safety of self and others at all times.
- Demonstrating safe workplace practices consistent with Altogether's WHS policies and procedures.
- Proactively identifying unsafe workplace conditions and/or practices and taking preventive and corrective actions as applicable.
- Key contributor and role model in identifying and acting on workplace safety improvements, particularly in relation to infrastructure design, construction and commissioning practices.

Environmental accountabilities

- Executing a duty of care with regard to the environment
- Demonstrating workplace practices consistent with Altogether's environmental and sustainability policies and procedures, particularly in relation to the operation and maintenance of infrastructure.

Quality accountabilities

- Understand and execute quality standards outlined in Altogether quality and management plans, policies and procedures, including the Business Management System and ISO 9001 Quality Management Systems.
- Take ownership of work, participate in quality improvement training and track quality performance to continually identify methods for improvement
- Build and retain channels to connect with customers and get instant feedback

Qualifications & Experience

Qualifications:

- Process/ chemical, mechanical or electrical engineering degree
- Formal qualifications in a recognised continuous improvement methodology such as Six Sigma or Lean Sigma is preferred, but not essential.
- Completion or working towards completion of Certificate III in Water Industry Treatment (or other specialty in the National Water Training Package) is preferred, but not essential.
- Current driver's licence.
- Construction induction card (white card).

Experience:

- Wastewater treatment plant experience preferred including experience in biological treatment processes
- Exposure to control systems including PLCs and SCADA is essential
- Background and understanding of the water treatment/utilities sector.

Skills and Personal Attributes

Skills:

- Proficient in Microsoft Office.
- Experience in analytics, data manipulation and MS Excel is essential (MS Access is preferred)
- Experience in business case development
- Experience in stakeholder management in an operations context and across business units.
- Experience in Oracle Netsuite is preferred but not essential
- Experience in Computerised Maintenance Management Systems (PC and mobile applications)
- Strong skills in troubleshooting, problem-solving, and conflict resolution.

Personal Attributes:

- Ability to work independently in a small enterprise environment and be a self-starter.
- Ability to manage time and prioritise competing responsibilities.
- Dedication to continuous improvement and identifying and implementing areas for process improvement and efficiency whilst maintaining compliance with regulations and Altogether's systems and processes.
- Positive team-orientated attitude, working collaboratively as well as autonomously in a small enterprise environment.
- Straight forward, self-confident and high self-awareness.

- Ability to contribute to a workplace environment that fosters learning, teaching, personal and professional growth, calculated risk-taking, innovation and fun.

Other relevant requirements:

- Flexibility to travel intrastate and interstate as required from time to time.

Important additional information

The manager will discuss all elements of the role brief with the post holder, it is recognised that role requirements may change over time to align with business need.

- Background and understanding of the water treatment/utilities sector.
- Exposure to the principles of asset management, including ISO 55000.

Skills and Personal Attributes

Skills:

- Experience in water and wastewater treatment processes.
- People management skills to inspire direct reports towards success.
- Experience with operating control systems, as well as mechanical and electrical equipment.
- Proficient in Microsoft Office.
- Procurement and commercial management skills
- Experience in stakeholder management in an operations context and across business units, including the ability to present business cases and ideas in a compelling way.
- Experience in Oracle Netsuite is preferred but not essential.
- Experience in Computerised Maintenance Management Systems (PC and mobile applications) is essential.
- Strong skills in troubleshooting, problem-solving, and conflict resolution.

Personal Attributes:

- Inherent commitment to compliance and driving a compliance culture
- Ability to work independently in a small enterprise environment and be a self-starter.
- Attention to detail and systemised approach

- Clear, concise verbal and written communication skills including the ability to clearly articulate, record, assign and follow up on actions.
- Ability to manage time and prioritise competing responsibilities.
- Dedication to continuous improvement and identifying and implementing areas for process improvement and efficiency whilst maintaining compliance with regulations and Altogether's systems and processes.
- Positive team-orientated attitude, working collaboratively as well as autonomously in a small enterprise environment.
- Straight forward, self-confident and high self-awareness.
- Ability to contribute to a workplace environment that fosters learning, teaching, personal and professional growth, calculated risk-taking, innovation and fun.

Other relevant requirements:

- Flexibility to travel intrastate and interstate as required from time to time.

Important additional information

The manager will discuss all elements of the role brief with the post holder, it is recognised that role requirements may change over time to align with business need.

The information contained within this role brief is provided for guidance, is not contractual, and is not an exhaustive list of all accountabilities that the post holder may have.

As Altogether is a geographically dispersed organisation there may be a requirement to travel to other sites in support of business delivery.

Position title	Network Engineering Manager
Reporting to	Executive Manager, Sustainable Utility Servicing
Functional team	Sustainable Utility Servicing
Location	Sydney-based, with travel to site locations as required
Date	21 June 2019, rebranded March 2022

Purpose of Role

The primary purpose of this role is to provide network engineering expertise to the Sustainable Utilities Servicing team for the delivery of new utility schemes within Flow, with task-level responsibility for project planning, procurement, contract management, design and construction of network projects.

Key relationships

<p>Direct reports:</p> <ul style="list-style-type: none"> DA Reviewer 	<p>Key internal stakeholders:</p> <ul style="list-style-type: none"> Project Delivery team Water Operations team Retail team Risk & Compliance team 	<p>Key external stakeholders:</p> <ul style="list-style-type: none"> Property developers and their contractors Other clients (eg. Councils) Contractors & suppliers Public utilities Regulators (IPART, EPA)
--	---	---

Core responsibilities, duties and accountabilities

Directly:

- Be accountable for the engineering, delivery and contract management of the on-lot and network infrastructure including measures to maintain or improve water balance
- Development and maintenance of the Network Management Procedure
- Preparation of monthly management reports that concisely and accurately provide relevant information concerning the status of network projects, compliance certificates, connection forecasts, cost and revenue forecasts, commercial and technical risks
- Maintenance of the centralized development profile records ("Lot connections" register or equivalent) as current for the reliance of others for cashflow forecasting and client invoicing
- Procurement of term contracts for on-lot and network infrastructure supply and installation contracts as they become due for renewal
- Contract superintendent/manager for design, supply, installation and quality control contracts associated with on-lot and network infrastructure
- Development, implementation and regular review of integrated water management plans for each scheme in accordance with the Integrated Water Management Policy
- Feasibility investigation, identification, recommendation and implementation (when approved) of water balance projects to achieve the aims of the Integrated Water Management Policy and to

mimimise water scheme opex including data acquisition, collation, management and analysis for this purpose

- Working knowledge of WICA licence boundaries and client agreements in the context of connection applications
- Close liaison with Risk and Compliance team to identify WICA and POEO licence application/variation requirements and take responsibility for providing relevant technical and scheme information for those applications and assessments
- Review of quality control packages for new development stages and 'gatekeeper' for the issue of compliance certificates
- Regular review of internal/external resourcing and structure and recommending solutions to improve efficiency and focus on priorities
- Ambassador for maintaining/improving the Flow brand to all stakeholders including clients, customers, supply chain, and regulators
- Demonstrating quality workplace practices consistent with Altogether's quality policies and procedures.

Directly and indirectly (as manager of other internal/external resources):

- Maintenance and implementation of the quality management process for network assets constructed by Flow, its developer clients and others (including but not limited to the Developer Works Installation Guidelines, infrastructure design standards) to ensure good quality outcomes and minimisation of life cycle costs for new assets
- Develop and keep current the systems, standards, policies and procedures required to enable and support industry best practice in all activities
- Review of all home DA plans and BASIX certificates for their compliance with Flow's requirements
- Management of engineering design consultants (particularly network reticulation civil and hydraulic designers) and water balance modellers
- Liaison with developers' design consultants in their development of reticulation network detailed designs and review of those designs against Flow's standards
- Responding to requests for information from developers' contractors during the installation of reticulation network infrastructure
- Management of reticulation quality control inspection process, inspectors and associated documentation
- Ensure that As Built, DBYD and asset management records are kept up to date and respond to DBYD enquiries where not handled by the automatic reply service
- Timely provision of network information to the Asset Manager for recording in the asset management system
- Close liaison with Water Operations and Retail functional teams to provide technical assistance relating to reticulation network design, construction and operations and manage the handover process and requirements
- Demonstrating quality workplace practices consistent with Flow's quality policies and procedures.

Risk Management and Compliance accountabilities

- Behaving in a professional, careful and conscientious manner that contributes to an effective risk management and compliance culture.
- Compliance at all times with Altogether's policies and procedures and with the law.
- Reporting potential and actual compliance breaches and new risks.
- Keeping up to date with relevant changes in legal and other requirements.
- Identifying and reporting compliance breaches.

- Identifying, assessing and managing risks.

Workplace Health & Safety accountabilities

- Executing a duty of care that ensures the health, wellbeing and safety of self and others at all times.
- Demonstrating safe workplace practices consistent with Altogether's WHS policies and procedures.
- Proactively identifying unsafe workplace conditions and/or practices and taking preventive and corrective actions as applicable.
- Key contributor to workplace safety improvements, particularly in relation to infrastructure design, construction and commissioning practices and safety in design.

Environmental accountabilities

- Executing a duty of care with regard to the environment
- Demonstrating workplace practices consistent with Altogether's environmental and sustainability policies and procedures.
- Manage incidents to minimise environmental impacts

Quality accountabilities

- Understand and execute quality standards outlined in Altogether quality and management plans, policies and procedures, including the Business Management System and ISO 9001 Quality Management Systems.
- Take ownership of work, participate in quality improvement training and track quality performance to continually identify methods for improvement
- Build and retain channels to connect with customers and get instant feedback

Qualifications & Experience

Qualifications:

- Tertiary qualifications relating to hydraulic and/or mechanical engineering

Experience:

- A strong background and understanding of the water utility sector
- At least 2 years' experience in the design and construction of water utility infrastructure, preferably in an urban development environment
- Experience with the design and/or installation of pressure sewer systems desirable

Skills and Personal Attributes

Skills:

- Advanced skills in pipeline hydraulics and/or mechanical engineering design and construction

- Advanced, disciplined organisational skills
- General understanding of supporting activities and relative sequencing associated with the design and construction of utility services infrastructure (eg. commissioning, metering, customer billing and administration)
- Demonstrable leadership skills and coordination of internal/external resources to achieve a common goal
- Clear, concise verbal and written communication skills
- Strong skills in troubleshooting, problem-solving, and conflict resolution
- Ability to contribute to a workplace environment that fosters learning, teaching, personal and professional growth, risk-taking, innovation and fun

Personal Attributes:

- Steadfast commitment to the achievement of deliverables on program
- Attention to detail and systemised approach to delivery
- Confidence and experience in managing stakeholders including the delivery of clear instructions and guidance
- Ability to work independently in a small enterprise environment
- Takes ownership of deliverables and drives them to completion
- Straight forward, self-confident self-starter with high self-awareness

Other relevant requirements:

- Flexibility to travel
- Driver's licence
- General computing skills
