SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

We need fairer prices for solar. We have spent many thousands getting 2 lots of panels to help our large family afford electricity and desperately need to be rewarded for our decision to help take the pressure off the environment. Our last bill saw a drop in our rebate from \$140 for half the bill to just \$20 savings. So even with 2 lots of panels I feel we are being ripped off big time and we are really upset as when all this first started we were never told that it would end at a certain date and we are a family of 10 and can't afford to waste many, many thousands trying to do the right thing, only to be ripped off. Every household should have solar. Think of the environment not just the all mighty dollar.
