Submission: Dear commissioner,

May I please urge that before you make a determination into Broken Hill water pricing please come to our city and Try to drink the filthy stinking water that we have to drink. If our water was being supplied by another business one would ask for our money back and would stop purchasing from that company. The water taste like water from a 3rd world country, it stinks when you shower in it, washing clothes in this water causes the clothes to smell and as for trying to cook any food in it is well the food has a horrible chemical taste to it. Essential water should be made to give a refund back to all consumers and we should not have to pay for the horrible water that they are providing, No way should essential water be allowed to charge more for the poor quality of water they are giving us. once again please come and spend 24 hours in Broken Hill drinking the crap that essential water is giving us, its not good enough.
