Subject: Catherine hill bay water licensing application and variations

Being a long term home owner in the bay, i find this amendment to be totally unacceptable.

This will be an eco problem and a health disaster.

Many children use this area where the proposed treatment is to be pumped to.

As this beach is very popular there must be another solution to this problem.

With more homes to be built in this area the issue will only get bigger.

I am against this proposal and was wondering if the EPA are aware of what's been proposed.
