SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:27:07 AM

To Whom it concerns:

I support a fair price for solar and the feed-in tariff should increase in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The true value of solar should be represented in the feed-in tariff while also recognising the environmental and health benefits and the network benefits of rooftop solar.

I have been generating solar electricity since late 2013, and the feed-in tariff I receive compared to the tariffs I am charged for usage is totally unfair and should be changed by any iPART proposal.

Regards,
bryan
