**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
10:26:01 AM

I support a fair price for solar feed in and that feed in tariffs should rise whenever electricity prices increase. Renewable energy is so important for our environment and the sustainability of future generations. A doubling of the current feed in tariff is welcome but in my opinion still does not equate to a completely fair deal for those contributing to the grid via rooftop solar. It still is not even equivalent to the price consumers pay for off peak power.
