SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:28:47 AM

The price paid for the solar energy needs to be a fair price. Householders have invested considerable funds to put their solar panels in place. They make an important contribution to the production of energy and should be paid a fair price. The current price being paid to householders is not fair. We are at a time of significant concern regarding climate change and securing our supply of energy. There is a need to support those who are contributing to both these issues.
