Submission: As a resident of Broken Hill I find the passing on of cost of this disgruntled pipeline and the additional cost of water revolting and turgid. The decommissioning of Menindee Lakes and the future of The Darling River at a cost of favouring irrigators and farms is repulsive. To already burden an additional cost will determine of the towns and locals already struggling's future. This pipeline is an insult to communities in the Lower Basin and to put it at a cost of the Australian environment is appalling, as to benefiting lining the pockets of irrigators and politicians. Cost ? This makes me sick. A true treasonous act to be remembered in Australia's history. Put a cost on that.
