Date of submission: Wednesday, 9 May 2018

Submission: "I do not support cutting the NSW solar feed-in-tariff benchmark set by IPART. Solar producing households should be fairly remunerated for the benefits they provide, including lowering carbon and other pollutant emissions and reducing the wholesale cost of power.

IPART should set a regulated minimum fit rate applicable to all electricity providers. At present many retailers offer rates below the benchmark, and this is just not fair on solar households.

I request that my name not be published."
