Submission: "Hello,

I wish to express my disappointment to read that you are contemplating a reduction in the feed-in tariffs for private solar power owners.

We have helped reduce the cost of wholesale power production, so why penalise us, the private solar system owners?

We need to be acknowledged and should be rewarded with an increase in tariff, not a decrease.

You are taking advantage of a system that we chose to pay for, to reduce greenhouse gas emissions.

Please reverse this decision before it is implemented.

Geoff Lockhart"
