SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:32:07 AM

I would like to take a moment to express my support of a fair price for solar. In addition to an increase in the solar feed in tariff, I would also support regulations requiring retailers to offer a minimum price. A fair tariff price would be instrumental in increasing the uptake of solar by households and relieving the current pressure on our outdated and limited resources and their related increase in cost for all consumers. The tariff needs to reflect the investment made by households and not just line the pockets of the big energy companies.
