SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:37:05 AM

I strongly support a fair price for solar, with a feed-in tariff increasing in line with the wholesale price of electricity. Moreover, the feed-in tariff should represent the true value of solar, which means recognising the environmental and health benefits and the network benefits of rooftop solar. I was extremely disappointed and frustrated when the feed-in defaulted to 6 cents, to the extent that I am seriously considering going fully off-grid in the situation does not change. The more people like me who do this of course then drives the price up for grid power, which is not my desire. A fairer system is needed.
