Submission: The Draft Report reflects the ongoing highly inefficient and labour intense management of the scheme on NSW Government side at the taxpayers' expense, i.e. salaries of the staff involved and the legal & administrative resources. This is not acceptable and should be addressed.

Furthermore, at least 3 key points are completely omitted in the Draft Report:

1. Cooperation with other states and potential container registration in one central place as oppose in every state and territory.
2. Impact of the administrative compliance on small businesses.
3. Assessment of non-complaint containers and businesses and the actions proposed to increase the compliance rate.
